Shutdown of Flight 007: The American Connection

Questions and Answers

1. What was Flight 007? On September 1, 1983, Korean Air Lines Flight 007, a Boeing 747 carrying 269 passengers and crew, was shot down by a Soviet fighter jet. The flight had strayed into Soviet airspace over Sakhalin Island.

2. How did the flight get off course? The exact cause of the deviation is unclear. Theories include navigational error, sabotage, and a deliberate military incursion. The U.S. government alleged that the Soviets lured the flight into Soviet airspace to collect intelligence.

3. What was the American connection? The U.S. National Security Agency (NSA) was monitoring Flight 007's transmissions and knew that it was off course. However, they did not inform the Soviets or the South Korean government, which could have averted the tragedy.

4. Why did the NSA not inform the Soviets? The NSA's motivation is disputed. Some believe they wanted to gather more intelligence on Soviet air defense systems, while others suggest they were negligent or did not want to risk escalating tensions with the Soviets.

5. What were the consequences of the shootdown? The incident strained relations between the U.S. and the Soviet Union. It also led to international condemnation of the Soviet government and raised questions about the reliability of the NSA. The incident contributed to the development of new air traffic control procedures to prevent similar incidents.
