Neurological conditions, such as dementia, traumatic brain injury, Parkinson's, multiple sclerosis, stroke, or long COVID. Mental health conditions, such as depression or anxiety.

Why are some people really good at word search? So-called "fluid intelligence", or the ability to "make the mind jump through hoops" while solving problems, is directly linked to the ability to untangle cryptic clues, researchers found.

Are word searches good for the brain? "Unfortunately, there's really no conclusive evidence supporting that word games and puzzles benefit the brain over time," says Dr. Tanu Garg, a neurologist at Houston Methodist. For instance, studies haven't shown that they help prevent memory loss or reduce the risk of developing dementia.

What are the directions for the word search puzzle? Instructions: The words in the puzzle may be hidden horizontally, vertically, diagonally, forward, or backward. Circle discovered words with different colors, and cross them off the list when you've found them. When all of the words are found, you will know many important terms related to the Richter Magnitude Scale.

How do I make a word search more difficult? - Increase the number of diagonals and backward-placed words. People tend to find words written forward, and either horizontally or vertically placed, easiest to find. Therefore by increasing the number of words backwards and diagonally placed, you can make them trickier to find in the grid.
