Understanding Thornbury's Rules of Teaching Grammar\*\*

Scott Thornbury, a renowned English language teacher and academic, has established a set of principles for teaching grammar effectively:

- **Build on what learners know:** Connect new grammatical concepts to learners' existing knowledge.
- **Present grammar in context:** Introduce grammar within meaningful sentences or texts to enhance understanding.
- **Encourage learner discovery:** Allow learners to actively participate in discovering grammatical patterns.
- **Provide explicit explanations:** Clearly explain grammatical concepts using simple and accessible language.
- **Use a variety of input:** Expose learners to grammar through different sources like texts, dialogues, and videos.

## Teaching Methods for English Grammar

There are several teaching methods for English grammar, each with its advantages and disadvantages:

- **Deductive approach:** Teaching grammar rules explicitly and then providing examples.

- **Inductive approach:** Presenting learners with examples and guiding them to discover grammatical patterns.
- **Communicative language teaching (CLT):** Integrating grammar into real-life communication activities.
- **Task-based learning (TBL):** Using tasks to provide opportunities for learners to use grammar in meaningful contexts.
- **Content and language integrated learning (CLIL):** Teaching grammar in conjunction with subject-specific content.

### Steps for Teaching Grammar

Teachers should follow these steps while teaching grammar:

1. **Introduce the concept:** Clearly state the grammatical concept and its purpose.
2. **Provide examples:** Use authentic and contextualized examples to illustrate the concept.
3. **Explain the rule:** Provide a clear and concise explanation of the grammatical rule.
4. **Facilitate practice:** Guide learners through practice exercises to reinforce understanding.
5. **Encourage application:** Create opportunities for learners to use the grammar in real-life situations.

### Five Methods of Teaching English Language

There are five main methods of teaching English language:

- **Grammar-translation method:** Focuses on the study of grammar and translation.
- **Direct method:** Emphasizes teaching through the target language without translation.
- **Audio-lingual method:** Uses repetition and oral drills to develop fluency.
- **Communicative approach:** Prioritizes real-life communication skills.

- **Task-based approach:** Uses tasks to enhance language use in meaningful contexts.
