## **Yes or No: The Guide to Better Decisions**

In his book "Yes or No: The Guide to Better Decisions," Spencer Johnson presents a simple yet effective framework for making better decisions. Johnson argues that we often make poor decisions because we are overwhelmed by information and emotions. By using the "Yes or No" framework, we can simplify the decision-making process and focus on what is truly important.

### **Question 1: Is there a clear purpose or objective?**

- **Answer:** If you can't define the purpose of your decision, you're setting yourself up for failure. Take the time to articulate what you want to achieve before you start considering options.

### **Question 2: Are the facts clear and complete?**

- **Answer:** Make sure you have all the information you need before making a decision. Don't guess or rely on assumptions. Gather relevant data and consult with experts if necessary.

### **Question 3: Are the values aligned?**

- **Answer:** Your decision should be consistent with your values and beliefs. Consider how the decision will impact your personal and professional life. If there is a conflict between your values and the decision, you may need to reconsider.

### **Question 4: Is it the right thing to do?**

- **Answer:** This question goes beyond your values. It asks whether the decision is ethical and moral. Consider the impact of your decision on others and on the greater good.

### **Question 5: Do you have a gut feeling?**

- **Answer:** Sometimes, our intuition can provide valuable guidance. If you have a gut feeling about a decision, don't ignore it. However, don't let your

gut feeling override the other four questions.

## **Conclusion**

By asking yourself these five questions, you can significantly improve the quality of your decisions. The "Yes or No" framework forces you to focus on the most important factors and to weigh the pros and cons carefully. By following this simple process, you can make more informed and confident decisions that will lead to better outcomes.
