### Why Did Japan Attack Pearl Harbor? A DBQ Analysis

#### **Question 1: Explain Japan's initial motives for attacking Pearl Harbor.**

**Answer:** Japan's primary motive was to cripple the U.S. Pacific Fleet, neutralizing its presence in the region. By destroying the fleet, Japan aimed to secure its expansion in Southeast Asia, where it had recently invaded French Indochina and was planning to seize oil and other resources.

#### **Question 2: Analyze the role of economic factors in Japan's decision to attack.**

**Answer:** Japan was facing a severe economic crisis due to its reliance on imported oil and its dwindling foreign exchange reserves. The U.S. had imposed sanctions on Japan in July 1941, restricting its access to these resources. This economic pressure played a significant role in Japan's decision to attack Pearl Harbor in an attempt to break the sanctions and secure access to oil.

#### **Question 3: Evaluate the impact of military planning and intelligence on the attack.**

**Answer:** Japan had carefully planned the attack for months, gathering intelligence on the U.S. fleet and the defenses of Pearl Harbor. Their plan involved a surprise aerial attack using multiple waves of aircraft carriers, which caught the U.S. forces unprepared. However, intelligence failures and miscommunication among Japanese commanders led to some errors in the attack, particularly the failure to destroy the U.S. aircraft carriers.

#### **Question 4: Discuss the consequences of the attack on the United States.**

**Answer:** The attack on Pearl Harbor was a devastating blow to the United States, killing over 2,400 Americans. It prompted the U.S. to declare war on Japan and enter World War II. The attack also led to a shift in American public opinion from isolationism to a desire for revenge and victory.

#### **Question 5: Summarize the primary reasons for Japan's attack on Pearl Harbor.**

**Answer:** Japan attacked Pearl Harbor primarily to cripple the U.S. Pacific Fleet, secure its expansion in Southeast Asia, and relieve economic pressure from U.S. sanctions. The attack was a carefully planned operation that relied on intelligence and surprise. However, it had major consequences for both the United States and World War II.
