**What is the website that answers physics questions?** Wolfram|Alpha helps you explore step-by-step answers to a wide range of physics problems to help with homework or general education.

**What questions are asked in physics practical class 12?**

**What is the world's hardest physics question?**

**How many questions are to be answered in physics practical?** Physics practical The candidate is given three hours. In the physics practical, the candidates are allowed to choose only two questions and answers.

**Is there an app that solves physics questions?** Physics AI expertly tackles an array of physics queries – be it multiple choice, word-based, diagrams, math-centric, or any other type. Simply snap a photo or upload your question, and watch as Physics AI swiftly deciphers and guides you through a comprehensive solution.

**Can ChatGPT solve physics problems?** ChatGPT is not only capable of solving a physics computation problem but also generating a new problem that share the same physics principle with the given input problem. For example, we use a permute-instruction prompt “Permute the physics variables and give me another problem.

**What are the biggest questions in physics today?**

**How do I prepare for a physics practical exam?**

**What are the most interesting questions in physics?**

**What are the 7 biggest unanswered questions in physics?**

**What are 5 questions science can't answer?** What happens to us after we die? How did so much life appear on our planet when others seem devoid of any species at all? Who, if anyone, pulls the strings of our universe? Is it some all-powerful god in control or are there physical and mathematical principles driving the engine of our existence?

**What is the most complicated physics thing?** Quantum mechanics is deemed the hardest part of physics.

**How to learn practical physics?**

**How to pass physics?**

**What are the important questions in physics?**

**What is the hardest question to solve in physics?** Size of universe: The diameter of the observable universe is about 93 billion light-years, but what is the size of the whole universe? Is the universe infinite? Baryon asymmetry: Why is there far more matter than antimatter in the observable universe?

**What is the best website for physics answers?**

**How to solve physics quickly?**

**Is there a website that solves physics problems?** If you're stuck on a physics question and don't know where to turn for help, Smodin Physics Solver is here to assist you.

**Which AI can solve physics?** StudyMonkey AI can tutor complex Physics homework questions, enhance your essay writing and assess your work—all in seconds.

**How good is ChatGPT 4 at physics?** Compared with the performance of ChatGPT-3.5 and the students, ChatGPT-4 performed better in solving physics conceptual understanding problems and physics reasoning problems.

**What app can I use to answer physics questions?** PhyWiz solves your physics homework for you. Get step by step solutions for questions in over 30 physics topics like Kinematics, Forces, Gravity, Quantum Physics and many more. Ask PhyWiz a question like "if mass is 6 and velocity is 7, what is momentum?" and get your answer immediately.

**What is the number one rule of physics?** Newton's First Law: Inertia Newton's first law states that every object will remain at rest or in uniform motion in a straight line unless compelled to change its state by the action of an external force. This tendency to resist changes in a state of motion is inertia.

**What is the hardest formula in physics?** For example, the equation  $\frac{d}{dx}(x^2 \frac{dy}{dx}) + x^2 y^3 = 0$  is already unsolvable (and this is a realistic equation: the Lane-Emden equation models a polytropic star), but we can make it even harder by inserting  $\frac{d}{dx}(x^2 \frac{dy}{dx}) + x^2 y^3 = f(x, y)$  where  $f(x, y)$  is some non-zero and perhaps non-linear function.

**How can I improve my practical physics?**

**What is the best way to practice physics?**

**How do you practice physics questions?** Use flashcards and sticky notes. Physics and Chemistry have a lot of formulas that you need to remember in order to solve the questions. To remember them better, write down the formulas on the sticky notes and flashcards. Stick them on your study table and keep glancing at it whenever you get time.

**What is the best website for physics questions?**

**Is there photomath for physics?** Yes, there are several applications similar to Photomath for physics and chemistry. Some examples include Physics Calculator, Chemistry Calculator, and Symbolab.

**How can I solve physics questions?**

**How do I check my physics answers?**

**Where can I ask physics questions for free?** Physics Stack Exchange is a question and answer site for active researchers, academics and students of physics and astronomy.

**How do you practice physics questions?** Use flashcards and sticky notes. Physics and Chemistry have a lot of formulas that you need to remember in order to solve the questions. To remember them better, write down the formulas on the sticky notes and flashcards. Stick them on your study table and keep glancing at it whenever you get time.

**How can I practice physics test?**

**Where can I get answers to physics questions?** Studybay is the place to go for answers to your physics problems. Ask your question here, and you'll get the best solutions that will help you finish your project as quickly as possible with the most favorable outcomes.

**Is there an AI to solve physics problems?** Wolfram Alpha is like a supercharged calculator for physics and math that leverages AI to solve a vast range of problems, including even some difficult physics tasks.

**What math do physicists use?** A strong mastery of basic high-school level algebra, trigonometry, analytic and synthetic geometry, and single-variable calculus is required at the very least if one wishes to do serious research in the physical sciences.

**What app can I use to answer physics questions?** PhyWiz solves your physics homework for you. Get step by step solutions for questions in over 30 physics topics like Kinematics, Forces, Gravity, Quantum Physics and many more. Ask PhyWiz a question like "if mass is 6 and velocity is 7, what is momentum?" and get your answer immediately.

**Is there a website that solves physics problems?** If you're stuck on a physics question and don't know where to turn for help, Smodin Physics Solver is here to assist you.

**How to solve physics questions easily?**

**How to learn physics correctly?**

**What to do if you are not able to solve physics problems?** Physics is hard but the best way to learn is to first study some solved problems similar to the ones you'd like to solve. Then you'll find the patterns in those solutions and you can apply those to techniques to your problems. Even better, find an expert and let them examine your thought process.
