When possible, begin searching _____ seconds ahead of the intersection.? Searching 20 to 30 seconds ahead and identifying an alternate path 12 to 15 seconds ahead into which the vehicle can be steered, will help drivers avoid most threatening situations. The driver must also diligently monitor the immediate path, 4 to 8 seconds ahead.

What is meant by the four second immediate path of travel? A three to four second following distance is the minimum you should allow between your vehicle and the vehicle ahead of you. This will provide you time to stop quickly if it is safe to do so. If it is not safe to stop, you will have time to steer into an identified open path of travel.

What is a circular intersection where vehicle paths do not cross? Roundabouts are a form of intersection control in common use throughout the world.

When stopped in traffic behind another vehicle, the driver should? When stopping behind another vehicle, make sure you can see where the rear tires of the vehicle in front meet the road. After traffic starts to move, return to a safe following distance. There are situations, such as those listed below, when you need even more space between your vehicle and the one in front of you.

How many feet may you legally travel in a left turn? You may only drive for 200 feet in the center left turn lane. To turn left from this lane: Look for other vehicles coming toward you in the center left turn lane. Signal.

When a driver looks away for 2 seconds or more, the risk of crash will _____.?
Looking away from the path of travel for 2 or more seconds doubles the likelihood of a crash, according to AAA. Headset cell phone use is not substantially safer than hand-held use.

When you are two 2 seconds from the intersection, brake to a stop if your front zone closes.? Under normal conditions, the point-of-no-return is two seconds from an intersection. If you identify a closed front zone, you should prepare to reduce speed or stop.

When making a U turn, it is very important to look for _____.?
Explanation: When making a U-turn, it is very important to look for pedestrians, oncoming traffic, traffic signals, and road signs.

Do not open your door into another vehicle. This event can trigger _____.?
Expert-Verified Answer. When a driver opens their door to another vehicle, it can be a frustrating and anger-inducing experience for the other driver, which can lead to road rage. Road rage is a dangerous and aggressive behavior that can cause accidents, injuries, and even fatalities.

When braking in an emergency stop, you should? Press firmly down on the brake pedal, applying as much braking force as possible without inducing a skid. If you feel any of the wheels begin to lock up, release the brake pressure slightly and re-apply. Hold firmly until you stop.

What refers to speeding without realizing it? The phenomena of “velocitation” is a tendency to gradually accelerate without noticing or perceiving the actual speed you are driving, because you are adjusting to the other vehicles around you instead of actually monitoring your speedometer.

Where does one out of three fatal crashes occur? Signalized Intersection Crashes Signalized intersections represent about one-third of all intersection fatalities, including a large proportion that involve red-light running. _____

What is the four-second rule in driving? What is the 4 second rule to help you maintain a safe following distance? The 4-second rule means keeping four seconds worth of space between your car and the vehicle in front, ensuring enough reaction time for sudden stops.

What are two things a driver is not allowed to do while driving? Don't engage in other activities while driving that distract your attention or reduce your reaction time. Eating, changing clothes, or putting on makeup while driving is dangerous. In some states, you can be ticketed for "driver inattention" for these activities.

When your line of sight is blocked, you should _____.? If your line of sight is obstructed in the intersection or beyond, slow down - there may be hidden hazards. If you are moving in traffic and other vehicles are blocking your view, re-position your vehicle or increase following distance so you can see to react.

Can you cross two solid yellow lines? A double solid yellow line indicates that there is absolutely no passing or crossing the double solid yellow line at any time. Shifting into another lane or attempting to pass another vehicle is not allowed when a double solid yellow line is present.

What are the four situations that you should always check behind you?

What does a solid white line mean? White lane markings are the most common. Solid white lines define lanes of traffic going in the same direction, or they show you the location of the shoulder of the road. Broken or "dotted" white lines are used to show the center line between lanes. •

What are the two only skills a driver can do to avoid a collision?

What vehicle can stop a lot faster than one without? Explanation: The vehicle that can stop a lot faster than one without is the one fitted with Anti-Lock brakes. Anti-Lock brakes, often abbreviated as ABS (Anti-lock Braking System), are a safety feature that prevents the wheels from locking up (or seizing to rotate) while braking, thereby avoiding uncontrolled skidding.

Why shouldn't you text and drive? You're Taking Your Eyes Off the Road Of all the activities associated with distracted driving, sending text messages is the most

dangerous. A person is 23 times more likely to have a motor vehicle crash while sending a text message than if they were only driving.

How far in advance should you be searching ahead of an intersection? In the city/urban area, you should look at least two blocks or two traffic signals ahead. In a suburban area, you should look at least three blocks or three traffic signals ahead. In a rural area, you should look at least a quarter of a mile ahead.

How many seconds should you search ahead when driving? To give yourself time to react, avoid last minute moves and hazards, always keep your eyes moving and scan the road at least 10 seconds ahead of your vehicle.

How many seconds ahead should a driver scan at an intersection? Expert drivers try to focus their eyes 20 to 30 seconds ahead. In the city, that equals approximately one block. Avoid staring at the middle of the road. Scan from side to side, checking for traffic signs and signals, cars or people that might be in the road by the time you reach them.

Why is it important to search 30 seconds ahead when you drive? To have adequate time and space to avoid obstacles in your path you need to search the traffic environment as far ahead of your vehicle as possible. Make every effort to establish a clear line of sight so you can search the traffic environment about 30 seconds ahead.
