**Which three languages evolved from Latin and are considered the modern Romance languages?** The Romance languages are a group of related languages all derived from Vulgar Latin within historical times and forming a subgroup of the Italic branch of the Indo-European language family. The major languages of the family include French, Italian, Spanish, Portuguese, and Romanian.

**What was the influence of Latin and the Romance languages?** As the Roman Empire expanded, Latin spread throughout the empire and became the lingua franca of the western world. It was used for religious, legal, and administrative purposes, and it became the basis for many of the Romance languages, including Italian, Spanish, French, and Portuguese.

**What language did Romance evolve from?** Romance languages (also known as Romantic languages) come from Vulgar Latin and are a part of the Indo-European language family. The most well-known and widely spoken romance languages are: Spanish.

**Why is Latin a dead language?** Classical Latin, the language of Cicero and Virgil, became “dead” after its form became fixed, whereas Vulgar Latin, the language most Romans ordinarily used, continued to evolve as it spread across the western Roman Empire, gradually becoming the Romance languages.

**Why is Vulgar Latin called vulgar?** The term Vulgar Latin comes from the Latin word vulgaris, meaning "common". It is also called Common Latin and Colloquial Latin and was typically used by middle-class people in the Roman Republic and Empire, while the upper classes continued to use Classical Latin.

**Why is Latin no longer in popular use?** Latin essentially “died out” with the fall of the Roman Empire, but in reality, it transformed — first into a simplified version of itself called Vulgar Latin, and then gradually into the Romance languages: Spanish, French, Italian, Portuguese and Romanian. Thus, Classical Latin fell out of use.

**Why isn't English a Romance language?** The easy answer is that English and German follow very similar syntax (word order) and grammar. Adjectives and adverbs come before nouns in a sentence. Romance languages follow the opposite pattern. For example, English-speakers say “the red car,” but in Spanish the phrase could be “el auto rojo” (or, “the car red”).

**How did Latin turn into Italian?** Modern Italian, like many other languages, originated from Latin. After the Roman Empire fell, Classical Latin continued to be used for most writings.
