**What is the pass rate for the ATLS course?** The main analysis exhibited a significant difference (Fig. 1) in mean pass rates between the traditional (94.2% [92.2–96.3]) and modified (81.0% [74.8–87.3]) ATLS courses ( $t_{14.203} = 3.922$ ,  $p = 0.001$ ).

**What is the passing score for the ATLS exam?** Course Description achieving a minimum score of 75% on the written post-test; and. successful completion of a final assessment station.

**What happens if I fail ATLS?** MCQs are limited to 3 attempts in total (i.e.: one first attempt and two resits) within three months of the date of the ATLS Provider course. If you have not successfully passed the MCQ within the allotted time, or within 3 attempts, you will need to take the entire 3-day course again.

**What is the golden hour of the ATLS protocol?** The first 60 minutes after traumatic injury which is the most crucial period that determines the patient's outcome has been termed the “golden hour.” The concept that definitive resuscitative trauma care must be initiated within this early window has been publicized, taught, and practiced worldwide for more than four ...

**Is ACLS and ATLS the same thing?** ATLS and ACLS are not the same. ATLS stands for Advanced Trauma Life Support. It teaches medical professionals how to treat life-threatening and limb-threatening injuries. Although both are designed for medical professionals, ATLS is directed towards helping trauma victims as quickly as

possible.

**How many years is ATLS good for?** After the successful completion of the ATLS Student or Student Refresher course, your ATLS status is current for four years from the last date of the course. Students have up to six months after their status expires to take a Student Refresher course.

**How long does online ATLS take?** How long are the ATLS modules? These sessions are scheduled in a day and one-half time frame. How long is the online 10th edition Hybrid Course: Expect to spend approximately 9 hours in completing the course. This course is self-paced so you may go at your own speed to feel comfortable with all the material presented.

**Is ATLS only for doctors?** The ATLS course is designed for physicians who care for injured patients. Only physicians may be certified in ATLS.

**What is the failure rate for ATLS?** Results: Seven hundred forty-four healthcare providers participated in the course; 89.5% passed and 10.5% failed. Failure rates were lowest (. 0%) among Trauma/Surgical Critical Care (SCC) providers and highest among pediatric providers (28.6%).

**Is ATLS worth it?** Over 90% had positive attitudes towards ATLS, and 74% selected 'genuine improvement of management of trauma patients' as the most important reason for doing the course: 93% thought ATLS saved lives.

**What is the equivalent of ATLS?** Early Management of Severe Trauma (EMST) is internationally recognised as equivalent to Advanced Trauma Life Support (ATLS®).

**What is the ATLS 2 day course?** ATLS® is a global course, teaching a systematic process of trauma care for patients with life-threatening injuries. Throughout this two-day interactive course, you will learn a range of comprehensive and adaptable trauma management skills relevant to all specialties.

**Is there a grace period for ATLS 6 months?** If your certification has lapsed, you are allowed to take a recertification class up to 6 months after your ATLS card expiration date (this grace period only applies to your ability to take a recertification course, it may not continue your certification period for hospital credentialing purposes).

**What is the first step in ATLS?** The first stage of the primary survey is to assess the airway. If the patient is able to talk, the airway is likely to be clear. If the patient is unconscious, he/she may not be able to maintain his/her own airway. The airway can be opened using a chin lift or jaw thrust.

**What is the leading cause of death in trauma patients?** The most common overall primary COD was traumatic brain injury (TBI) (45%), followed by exsanguination (23%). Traumatic brain injury was nonsurvivable in 82.2% of cases. Blunt patients were more likely to have TBI (47.8% vs.

**What is the ABCD protocol of ATLS?** Current treatment standards for trauma patients follow the Advanced Trauma Life Support (ATLS). The acronym, ABCDE protocol, means Airway, Breathing, Circulation, Disability, and Environment.

**What is finger thoracostomy in ATLS?** Finger thoracostomy is an alternative pleural decompression technique recently introduced to the prehospital setting [33,36]. Since a finger has to enter the pleural space, finger thoracostomy may have a better chance of pleural decompression with less risk of lung injury compared with needle thoracostomy.

**Who should take ATLS?** For doctors and other qualified healthcare providers who treat traumatic disease on a frequent basis, the ATLS course provides a scaffold for evaluation, treatment, education, and quality assurance.

**What is the ATLS protocol?** ATLS® is a method to establish priorities in emergency trauma care. There are three underlying premises. (1) Treat the greatest threat to life first. (2) Indicated treatment must be applied even when a definitive diagnosis is not yet established.

**Is ACLS harder than BLS?** Essentially, ACLS is a more advanced and sophisticated course that builds upon the basic fundamentals you develop during BLS – as both of the names suggest. However, there's much more to it than that.

**What is the ATLS protocol summary?** ATLS® is a method to establish priorities in emergency trauma care. There are three underlying premises. (1) Treat the greatest threat to life first. (2) Indicated treatment must be applied even when a definitive diagnosis is not yet established.

**What are the steps of ATLS?** ATLS emphasizes a protocol divided into a primary survey, resuscitation, a secondary survey, and definitive care. The primary survey hinges on the serial assessment of the “ABCs”: airway, breathing, and circulation. Resuscitation occurs simultaneously with the primary survey as necessary.

**What is the ATLS ABCDE protocol?** Recent history of trauma care The ATLS 'Airway, Breathing, Circulation, Disability, and Exposure' (ABCDE) mantra is familiar the world over.

**What are the principles of ATLS trauma?**
