The Art and Craft of Problem Solving: An Interview with Paul Zeitz

Problem solving is an essential skill in every field, from engineering to business to everyday life. In his book "The Art and Craft of Problem Solving," Paul Zeitz provides a practical and comprehensive guide to the problem-solving process.

Q: What is the most important step in problem solving?

A: Zeitz believes that the most important step is to define the problem clearly. "If you don't know what you're trying to solve, you won't be able to find a solution," he says.

Q: How can you generate creative solutions to problems?

A: Zeitz encourages readers to brainstorm as many solutions as possible, no matter how outlandish they may seem. "The more ideas you have, the more likely you are to find a workable solution," he says.

Q: What are some common mistakes people make when solving problems?

A: One common mistake is to get too attached to a particular solution. Zeitz recommends being open-minded and willing to explore all options, even if they seem unconventional.

Q: How can you improve your problem-solving skills?

A: Zeitz suggests practicing regularly and using a structured problem-solving process. "The more you practice, the more proficient you will become," he says.

Q: What is the most important lesson you have learned about problem solving?
