The Other Side of Innovation: Solving the Execution Challenge

(Based on the Harvard Business Review article by Govindarajan Vijay and Trimble Chris, 2010)

Q: What is the "execution challenge" in innovation?

A: Despite having great ideas and investing heavily in R&D, many companies struggle to translate their innovative concepts into successful products and services. This is known as the "execution challenge."

Q: How can companies overcome the execution challenge?

A: Govindarajan and Trimble argue that a structured approach is needed to bridge the gap between innovation and execution. This involves identifying key performance indicators (KPIs) and establishing clear milestones and accountability for achieving them.

Q: What role do employees play in successful innovation execution?

A: Employee engagement and alignment are crucial. Leaders must create a culture that encourages employees to take ownership of innovation projects, share ideas, and collaborate effectively. Trust and autonomy are essential for fostering innovation.

Q: How does organizational structure affect innovation execution?

A: The traditional hierarchical structure can hinder innovation. Companies should consider adopting a more flexible and agile approach, such as cross-functional teams and project-based organizations. This enables faster decision-making and allows for rapid iteration.

Q: What advice do Govindarajan and Trimble provide for companies facing the execution challenge?

A: They recommend focusing on the following:

- Establish a clear innovation strategy and KPIs
- Build a cross-functional team with clear roles and responsibilities
- Create a culture of collaboration and shared ownership
- Invest in employee development and training
- Monitor progress regularly and adjust the execution plan as needed
