**What is the main idea of Descartes Meditations?** The book is made up of six meditations, in which Descartes first discards all belief in things that are not absolutely certain, and then tries to establish what can be known for sure. He wrote the meditations as if he had meditated for six days: each meditation refers to the last one as "yesterday".

It was this theory of innate knowledge that was later combated by philosopher John Locke (1632–1704), an empiricist. Empiricism holds that all knowledge is acquired through experience.

arguing that the nature of the mind (that is, a thinking, non-extended thing) is completely different from that of the body ( ...

**What is Descartes goal in the Meditations quizlet?** What is Descartes' goal when he starts the Meditations? To challenge everything he knows in order to find a foundational belief that is beyond any doubt. Illusions give him a reason to doubt the senses.

**Does Descartes actually say I think, therefore I am in the meditations?** 1. Doubt and Skepticism. The phrase "I think, therefore I am" first appears in Discourse on the Method (1637).
