## **The Law of Trusts and Trustees**

The law of trusts and trustees governs the fiduciary relationship created when one party (the settlor) transfers property to another party (the trustee) to hold and manage for the benefit of a third party (the beneficiary). The trustee has a duty to act in the beneficiary's best interests and to manage the trust property prudently.

## **Equitable Doctrines**

- **Election:** This doctrine allows a beneficiary to choose between accepting the benefits of a trust and giving up their rights to other property that was transferred to the trust.
- **Performance:** This doctrine requires the trustee to carry out the terms of the trust, even if it is inconvenient or expensive to do so.
- **Satisfaction:** This doctrine allows a trustee to substitute one type of asset for another if the substitution is in the best interests of the beneficiary.
- **Conversion:** This doctrine treats property that is subject to a trust as if it had been sold and the proceeds invested in other assets.
- **Marshalling:** This doctrine allows a creditor to demand that the trustee use trust assets to pay off debts before resorting to the beneficiary's personal assets.

## 1919 Case

In a landmark 1919 case, the English Court of Appeal clarified the application of these equitable doctrines to trusts. In *Re Diplock*, the court held that the doctrine of election applied to a beneficiary who had received a gift under a will that was subject to a trust. The beneficiary was required to choose between accepting the gift and giving up his rights to other property that had been transferred to the trust.
