The Mystery of the Missing Tiger

What happened to the missing tiger?

In the early hours of June 12, 2023, a Sumatran tiger named Rajah vanished from his enclosure at the Riverstone Zoo. The 6-year-old male tiger had been a star attraction and his disappearance has baffled authorities.

How did Rajah escape?

Initial investigations revealed a small hole in the mesh fencing of Rajah's enclosure. It is believed that he slipped through the hole and escaped into the nearby woods. However, surveillance footage shows no signs of Rajah leaving the zoo, leading to speculation that he may still be hiding somewhere on the premises.

Why did Rajah disappear without a trace?

This is one of the biggest mysteries surrounding Rajah's disappearance. Tigers are territorial animals and typically do not travel far from their established territories. Rajah had been in the zoo for several years and was well-adapted to his environment. It remains unclear why he would have left his enclosure.

What efforts are being made to find Rajah?

Zoo authorities have deployed a team of trackers and search dogs to comb the woods and surrounding area. They are also working with local law enforcement and the public to gather any additional information. Drones and thermal imaging cameras

are being used to assist in the search.

What is the impact of Rajah's disappearance?

The disappearance of Rajah has been a devastating loss for the zoo and the conservation community. Sumatran tigers are critically endangered, and Rajah was an important part of the zoo's breeding program. His absence also raises concerns about the security of the zoo and the well-being of other animals in captivity.

The White Castle: A Labyrinth of Love and History

By Orhan Pamuk
