Maintenance and Common Issues of the Ford Transit Connect**

What is the life expectancy of a 2011 Ford Transit Connect?

With proper maintenance and driving conditions, a 2011 Ford Transit Connect can have a life expectancy of around 200,000 to 250,000 miles.

Will Ford replace the Transit Connect?

Ford has not officially announced plans to replace the Transit Connect. However, it has been rumored that the model may be discontinued in favor of the larger Transit van.

Why is my 2011 Ford Transit Connect running rough?

Rough running can be caused by several issues, including faulty spark plugs, dirty fuel injectors, clogged air filter, or ignition problems.

Where are the fuses in a Ford Transit Connect?

The fuses in a Ford Transit Connect are located in three different fuse boxes: the main fuse box under the hood, the interior fuse box on the passenger side, and the under-seat fuse box.

What is the most common problem with a Ford Transit Connect?

One of the most common problems reported with the Ford Transit Connect is transmission issues, particularly with the PowerShift dual-clutch transmission found

in earlier models.

What year is the bad Ford Transit Connect?

Models from 2010 to 2013 are considered to be more problematic due to issues with the PowerShift transmission.

Are there any recalls on the Ford Transit Connect?

Yes, there have been several recalls issued for the Ford Transit Connect, including recalls related to the PowerShift transmission, fuel pump failure, and airbag defects.

Maintenance and Replacement

What is replacing the Ford Connect?

There is currently no official replacement for the Ford Connect. However, the Transit van is a larger and more capable option that could potentially serve as a replacement in the future.

How many miles per gallon does a Ford Transit Connect get?

Depending on the model year and engine, the Ford Transit Connect can get anywhere from 20 to 24 miles per gallon in city driving and 25 to 30 miles per gallon on the highway.

What is high mileage for a Ford Transit Connect?

Mileage over 150,000 miles is generally considered high mileage for a Ford Transit Connect. However, regular maintenance and careful driving can extend the lifespan of the vehicle.

Troubleshooting and Repairs

What is the powertrain warning light on a Ford Transit Connect?

The powertrain warning light indicates a problem with the engine, transmission, or driveline. It can be triggered by various issues, such as electrical faults, sensor malfunctions, or mechanical failures.

Why is my Ford Transit Connect jerking when accelerating?

Jerking during acceleration can be caused by faulty spark plugs, ignition coils, fuel pump issues, or transmission problems.

How do you know if a disconnect fuse is blown?

A blown disconnect fuse typically causes electrical components to stop working or perform improperly. You can check if a disconnect fuse is blown using a test light or multimeter.

Which wire is the fuse connected to?

The fuse is connected to the positive (+) terminal of the battery.

Where is the main fuse connected?

The main fuse is typically connected to the positive (+) terminal of the battery.

Discontinuation and Reliability

Why did Ford discontinue the Transit Connect?

Ford has not officially discontinued the Transit Connect. However, rumors suggest that the model may be phased out in favor of the larger Transit van.

What is the code P0453 on a Ford Transit Connect?

The P0453 code indicates a problem with the evaporative emission control system, often related to a faulty purge valve or leak in the system.

Why does my Transit Connect keep cutting out?

Intermittent cutting out can be caused by various issues, such as fuel pump problems, electrical faults, or sensor malfunctions.

What is the common fault in the Ford Connect?

One common fault in the Ford Connect is related to transmission issues, particularly with the PowerShift dual-clutch transmission found in earlier models.

What is the best engine for the Ford Transit?

The 3.5-liter V6 EcoBoost engine is considered to be the best engine for the Ford Transit, offering a combination of power and fuel efficiency.

What is the most common problem with Ford Transit?

Common problems with the Ford Transit include issues with the diesel engine, turbocharger, and dual-clutch transmission.

High Mileage and Reliability

What is high mileage for a Ford Transit Connect?

Mileage over 150,000 miles is generally considered high mileage for a Ford Transit Connect.

Are Ford Transit Connect vans reliable?

The reliability of Ford Transit Connect vans varies depending on the model year. Earlier models with the PowerShift transmission have been plagued by issues, while later models have improved in reliability.

How long should a Ford Transit engine last?

With proper maintenance and driving conditions, a Ford Transit engine can last for over 200,000 miles.

Do Ford Transit Connect have transmission problems?

Yes, Ford Transit Connect vans with the PowerShift dual-clutch transmission have experienced significant transmission problems. Later models with the 6-speed automatic transmission have been more reliable.
