certain resources, services, and information.

What is the basic internetworking IP? Internetworking refers to the trade, products, and procedures that meet the challenge of making and administering internet works. To enable communication, every individual network node or phase is designed with a similar protocol or communication logic, that is Transfer Control Protocol (TCP) or Internet Protocol (IP).

Why is TCP/IP still used today? It ensures a reliable and orderly delivery of packets across networks. TCP is a higher-level smart communications protocol that still uses IP as a way to transport data packets, but it also connects computers, applications, web pages and web servers.

What are the 5 layers of TCP IP? It provides a reliable way for two systems to send and receive data, no matter where they may be located. The model consists of 5 layers responsible for packaging and transporting data between systems: the Application layer, Transport layer, Network layer, Data Link layer, and Physical layer.

Is TCP IP WiFi or Ethernet? TCP/IP – A TCP/IP protocol suite is the collection of communication protocols needed to communicate over Ethernet. The three most important components of the TCP/IP protocol suite are IP, TCP and UDP. IP – IP is the Internet Protocol. It is responsible for moving a packet from Point A to Point B.

What is the difference between networking and internetworking? The difference is that a network could be defined as a group of locally connected computers. For Eg :- Computers connected in an office buliding. Whereas, An internetwork is a collection of individual networks, connected by intermediate networking devices, that functions as a single large network.

What is the internetworking protocol known as? The Internet protocol suite is therefore often referred to as TCP/IP. The first major version of IP, Internet Protocol version 4 (IPv4), is the dominant protocol of the Internet.

What is the concept of interworking? 1. : the state or an instance of two or more things working with or being made to work with each other. an interworking of two computer games. 2. : the manner in which individual parts or members of something work together.

What are the TCP IP internetwork layer protocols? The TCP/IP suite of protocols can be understood in terms of layers (or levels). This figure depicts the layers of the TCP/IP protocol. From the top they are, Application Layer, Transport Layer, Network Layer, Network Interface Layer, and Hardware. TCP/IP carefully defines how information moves from sender to receiver.
