**Who Classification of Tumours of the Urinary System and Male Genital Organs**

The World Health Organization (WHO) Classification of Tumours of the Urinary System and Male Genital Organs is a comprehensive reference guide that provides  
BIOLOGY CONCEPTS AND CONNECTIONS 8TH EDITION

standardized terminology, diagnostic criteria, and molecular insights for tumours affecting these organs.

### **1. What is the purpose of the WHO Classification of Tumours?**

The WHO Classification serves as a globally recognized guide for clinicians, pathologists, and researchers. It facilitates accurate diagnosis, promotes consistent reporting, and provides a basis for clinical management and research.

### **2. Who publishes the WHO Classification?**

The WHO Classification is published by the International Agency for Research on Cancer (IARC), an agency of the World Health Organization.

### **3. What does the WHO Classification include?**

The WHO Classification includes detailed descriptions of the morphology, immunohistochemistry, molecular pathology, and clinical behavior of tumours of the urinary system (bladder, kidney, ureter, upper urinary tract) and male genital organs (prostate, testis, penis).

### **4. How is the WHO Classification updated?**

The WHO Classification is updated periodically to reflect advances in knowledge and new discoveries in tumour biology. The latest edition, the 5th, was published in 2022.

### **5. Why is the WHO Classification important?**

The WHO Classification:

- Provides a common language for communicating about tumours of the urinary system and male genital organs.
- Ensures accurate diagnosis and reporting, leading to optimal patient care.
- Facilitates research collaboration by enabling standardized data collection and comparison of results.
- Guides treatment decisions and prognostication, improving patient outcomes.

**What was the problem with the Harley Shovelhead engine?** For the Shovelhead, the low-quality fuel led to engine knocking and overheating. As the engine overheated, the aluminum expanded, causing oil leaks. Despite these issues, American Machine and Foundry, the owners of Harley-Davidson at the time, continued production without addressing the engine's problems.

**What was the last year for the Harley Shovelhead engine?** The Shovelhead engine is a motorcycle engine that was produced by Harley-Davidson from 1966 to 1984, built as a successor to the previous Panhead engine.

**Is a Shovelhead AV twin?** Harley-Davidson Shovelhead V-Twin Motorcycles - HISTORY OF THE BIG TWIN. 1966 Mainly to produce more power to maintain performance at the new higher weights of bikes with electric start, rear suspension, etc., the Shovelhead engine is introduced, produced 1966-85.

**Which Harley engine is the most reliable?** Among its engines, the best Davidson engine is the Milwaukee. Since the founding of Harley-Davidson motorcycles to date, the company's most reliable and advanced engine is the Milwaukee Eight. The engine was introduced in 2016 and comes in two versions, the 114 and 117 cubic inches of displacement.

**What is the life expectancy of a Harley engine?** The Harley-Davidson engine can last 60,000 to 250,000 miles with proper maintenance. Some models can last 400,000 to 1,000,000 miles. Whether you choose Softail, Evo, or Twin Cam motorcycle engines, complete the required maintenance. Replace the oil filter, air filter, worn-out valves, drive belts, and pistons.

**How much horsepower does a Shovelhead have?** The early 80-inch / 1310cc FLH Shovelhead engines made 66 horsepower at 5600 rpm, and power would remain between 60 and 65 horsepower throughout the engine's 18-year production run, which ended in 1984. The Shovelhead has been both loved and loathed by riders over the years.

**How fast is a Shovelhead?** 65/70 mph max speed.

**What year does Harley Twin Cam avoid?** It's widely known that Harley Twin Cam 88's problematic years were 1999-2002/2006 These early Twin Cam 88 models

experienced a lot of issues, causing Harley to design the slightly better TC88B and then the TC96 in later years.

**What is considered a Harley Big twin?** The "Big Twin" refers to engines with a displacement of 1200cc and above. X - The letter "X" is associated with the Sportster family of motorcycles. Sportsters are known for their agility, lighter weight, and smaller engine sizes compared to other Harley-Davidson models.
