The Iceman: True Story of a Cold-Blooded Killer Anthony Bruno

Who was Anthony Bruno?

Anthony Bruno, also known as "The Iceman," was a notorious hitman who operated in the 1960s and 1970s. Born in 1930, Bruno grew up in a violent home and was

exposed to criminal activity from an early age. He served in the Air Force during the Korean War and later became involved in organized crime.

How did he become a hitman?

Bruno began his career as a hitman for the DeCavalcante crime family in New Jersey. He quickly gained a reputation for his cold-blooded efficiency and lack of remorse. He reportedly killed over 20 people, often using an icepick as his weapon of choice. Bruno's victims included mobsters, informants, and anyone who crossed the path of the family.

Why was he known as "The Iceman"?

Bruno received the nickname "The Iceman" due to his emotionless demeanor. He was said to be able to kill without flinching and would often freeze his victims' bodies to prevent decomposition. This chilling method of disposing of his victims earned him his infamous moniker.

How was he caught?

Bruno was finally apprehended in 1981 after his former mistress, Deborah Peagler, turned him in to the authorities. Peagler had witnessed Bruno's violent behavior firsthand and feared for her own safety. Bruno initially denied the charges but later confessed to his crimes in a plea deal that spared him the death penalty.

Aftermath:

Anthony Bruno was sentenced to life in prison without parole. He died in 2008 at the age of 78 while still incarcerated. His story has been the subject of numerous books, films, and documentaries, capturing the public's fascination with the enigma of a cold-blooded killer and the inner workings of organized crime.

The Influence of Affluence: How the New Rich are Changing America

By Russ Alan Prince and Lewis Schiff (Paperback 2009)

Q: What are the key findings of the book "The Influence of Affluence"?

A: The book argues that the rise of a new affluent class in America is having a profound impact on society, from the way we consume to the way we govern ourselves. The authors find that the new rich are more likely to donate to charity, support social causes, and vote for progressive candidates than the old rich.

Q: How has the new affluent class changed the way we consume?

A: The new rich are driving a shift towards more sustainable and ethical consumption. They are more likely to buy organic food, support fair trade businesses, and reduce their carbon footprint. They are also increasingly interested in experiences over material goods.

Q: What impact is the new affluent class having on politics?

A: The new rich are more likely to be politically active than the old rich. They are more likely to donate to political campaigns, volunteer for candidates, and attend political rallies. The authors argue that this new political participation is leading to a more progressive political landscape.

Q: What are the challenges facing the new affluent class?

A: One of the biggest challenges facing the new affluent class is the growing income gap between the rich and the poor. The authors argue that the new rich must use their wealth and influence to address this inequality. They must also find ways to bridge the divide between the rich and the poor, and to create a more inclusive society.

Q: What is the future of the new affluent class?

A: The authors believe that the new affluent class will continue to grow in influence in the years to come. They argue that this class has the potential to make a positive impact on society, but only if they are willing to use their wealth and influence to address the challenges facing the country.
