

# HOW TO CREATE ODATA SERVICES FOR ANALYTIC QUERIES SAP

## [Download Complete File](#)

**How do you create an analytical query in SAP?**

**How to create a service in SAP OData?** Open SAP GUI and enter Tcode /n/IWFND/MAINT\_SERVICE to register the service. Give the system Alias name as 'Local' and paste the service name copied before[ZZZ\_ASSO\_BP\_CDS] in the external service name text box and then click enter. By selecting on created service name click add selected services. Assign a package.

**How to create an analytical CDS view in SAP?**

**How to create OData service for bex query?**

**How to use custom analytical queries?**

**How do I create a custom tile for analytical query?**

**What is the Tcode to create an OData service?** Go to transaction code /IWFND/MAINT\_SERVICE . Click on push button Add services . Next screen will appear, give the alias name and execute , Search you for your project . Now click back and go to main screen of transaction /IWFND/MAINT\_SERVICE and find your service.

**How many ways we can create OData service?** Creating an OData service you can use: (1) “Classical” ABAP (needed for ABAP platform = 7.4), which comes with significant higher efforts. (2) “SAP Fiori programming model” (ABAP platform = 7.5. 4) or SAP BTP, Steampunk/RAP and CAP (SAP BTP) both using CDS views. (see openSAP Fiori-EA1, Week1, Unit 4).

## **How to create OData service in SAP using RFC?**

**What is the difference between SAP view and CDS view?** CDS Views are designed to support standardized data models and are less flexible in terms of customization. ABAP programs are executed within the SAP system, whereas CDS Views are executed outside of the SAP system, in a separate layer called the SAP HANA database.

## **How do I create a SAP Analytics Cloud?**

## **How do I create an analytical view in SAP HANA?**

## **How to create a new OData service?**

## **How to use SAP OData service?**

## **How to create OData service from BAPI?**

**What is SAP embedded analytics?** Embedded analytics is a concept involving keeping the data in the operating system – in the case of SAP S/4HANA system it's SAP HANA database – and then, using a mechanism called a virtual data model, transforming on-the-fly data optimized for transactional purposes into an analytics-ready structure.

**How to use custom field in JQL?** JQL lets you search for a value in a specific field. Each field in Jira has a corresponding JQL name. If you've made a custom field, you'll be asked to name the field. In a clause, a field is followed by an operator, which in turn is followed by one or more values (or functions).

**How to capture SAP query in transport request?** Use Existing TR or Create new TR using the Icon “create request”--> write Description of TR-->Save... Now the system automatically Generated new TR Number. ( below screen shot)-->click OK.. Then click the Refresh button on à now the Query is assigned with Transport request along with Package.

**What is custom analytical query?** Custom Analytical Queries is a tool used for reporting and analysis. Raw data from business documents are getting converted into a meaningful grid. By using Custom Analytical Queries you do not need to

understand the technical details.

**How do I Create a custom query in SAP?**

**How do I Create a query in BEx Analyzer?**

**How to maintain OData service in SAP?**

**How do I activate OData services in Tcode?** To activate OData services, open Tcode /N/IWFND/MAINT\_SERVICE. All RDG required OData services have a prefix /RDG/. Each service ICF node should always be in an active state with system aliases maintained.

**Is SAP OData a REST API?** OData and REST are related but distinct concepts. REST is an architectural style for building web APIs, while OData builds upon REST to define best practices for building RESTful APIs. OData provides additional features such as enhanced query capabilities and standardized metadata.

**How to set up OData service?**

**How to create OData using RFC?** Right click on data model ,Import >>RFC/BOR Interface. Provide entity name and RFC enabled FM to proceed. Select required parameters. Mark suitable field as key and finish.

**How to create OData service based on search help?**

**How do you create a query in SAP?** To create a new query, enter a name for it, and choose the Create button. A new dialog box appears, showing all available InfoSets. Choose the InfoSet that you require for your query and confirm the dialog. On the Create Query screen, enter a title and a description for your query.

**What is an analytical query?** With analytical queries, you can combine data from multiple queries from the same or differing data sources into one result set. In some situations, you might need to draw data from several different sets of data, some of which might be stored in different data sources.

**How do I create an analytical view in SAP HANA?**

**How do you create an inquiry type in SAP?**

## **How do you create a query step by step?**

**How to use query generator in SAP?** To access the Query Generator choose from the Tools menu: Queries Query Generator. We recommend that you first define a few simple queries to familiarize yourself with this tool. Then write more complex reports as you learn.

## **How to create SAP query InfoSet?**

**What is the difference between operational and analytical query?** While analytical data reveals patterns, trends, and insights that aid in strategic decision-making, operational data includes real-time, transactional information that is critical for immediate decision-making and execution of tasks.

**What is analytical vs transactional query?** Transactional and analytical queries are similar in the way that they are written, but are used to serve different purposes. Transactional activities are those that support the day-to-day running of a business while analytical queries are used to provide the necessary information to support business decisions.

**What is a query in data analytics?** Data Querying is a critical process in data management - it's the method of requesting specific information from databases. SQL (Structured Query Language) is the most common language employed in data querying, with its purpose being to extract, manipulate, and analyze data stored in relational databases.

## **How do I Create a custom analytical query in SAP?**

**What is the SAP HANA analytic process?** A SAP HANA analysis process is always made up of exactly one data source, a function for data analysis and a data target. A SAP HANA analysis process can also be used as the source for another SAP HANA analysis process.

**What is SAP HANA Analytics?** SAP HANA (High-performance ANalytic Appliance) is a multi-model database that stores data in its memory instead of keeping it on a disk. The column-oriented in-memory database design allows you to run advanced analytics alongside high-speed transactions – in a single system.

---

**What is VA12 used for in SAP?** VA12 - Change Quotation: Used to modify an existing sales quotation. 7. VA13 - Display Quotation: Used to view details of a sales quotation.

**How to use VA21 in SAP?** Enter T-code VA21 in Command field. Enter quotation type. Enter Sales Organization / Distribution channel / Division in organizational block. Select Create with references button .

**What is va31 Tcode?** “ - [Instructor] Scheduling agreements are a type of outline agreement in SAP that define the terms and delivery dates of long-term commitments between companies and customers. Let's create a scheduling agreement in SAP using transaction code va31 and pressing enter.

### **TaylorMade Golf: Frequently Asked Questions**

**Q: What is TaylorMade Golf?** A: TaylorMade Golf is a leading manufacturer of golf equipment. Founded in 1979, the company is renowned for its innovative and high-performance products, including drivers, irons, wedges, and putters.

**Q: What is TaylorMade's claim to fame?** A: TaylorMade is known for its groundbreaking innovations, particularly in driver technology. The company introduced the iconic R5 driver in 2002, which revolutionized the golf industry with its oversized head and adjustable weight system. Subsequent driver models, such as the M-series, have further cemented TaylorMade's reputation as a leader in driver design.

**Q: What sets TaylorMade golf equipment apart?** A: TaylorMade prides itself on using advanced materials and technologies to optimize performance. The company utilizes premium graphite shafts, lightweight materials, and aerodynamic designs to create clubs that are both powerful and forgiving. TaylorMade also offers a wide variety of custom-fitting options, ensuring that golfers can find clubs that perfectly match their swing and game style.

**Q: Where can I find TaylorMade golf equipment?** A: TaylorMade products are available at golf retailers worldwide, including brick-and-mortar stores and online retailers. The company also has a direct-to-consumer website where customers can purchase the latest TaylorMade equipment and accessories.

**Q: What is TaylorMade's commitment to customer satisfaction?** A: TaylorMade places a high priority on customer satisfaction. The company offers a comprehensive warranty program on all its products and provides exceptional customer service before, during, and after purchase. TaylorMade is dedicated to delivering a positive experience for every golfer who chooses its equipment.

### **Strategic Brand Management: Keller's 4th Edition**

**Question 1:** What is strategic brand management according to Keller?

**Answer:** Strategic brand management is the process of creating and maintaining a brand's competitive advantage by developing and implementing a brand strategy that aligns with the organization's overall goals and objectives.

**Question 2:** Describe Keller's Brand Equity Model.

**Answer:** Keller's Brand Equity Model consists of four main components:

- **Brand Identity:** Who the brand is and what it stands for.
- **Brand Meaning:** The functional, emotional, and self-expressive benefits associated with the brand.
- **Brand Response:** The customer's reactions to the brand, including attitudes, loyalty, and purchase intent.
- **Brand Resonance:** The deep emotional connection that customers have with the brand.

**Question 3:** What is the role of brand positioning in strategic brand management?

**Answer:** Brand positioning involves creating a unique and meaningful image for the brand in the minds of consumers. It involves defining the brand's target market, identifying its competitive advantage, and developing a positioning statement that articulates the brand's core values and benefits.

**Question 4:** Explain Keller's Brand Pyramid.

**Answer:** Keller's Brand Pyramid is a hierarchical framework that describes the different levels of brand awareness and loyalty. It includes five levels:

---

- **Presence:** Consumers are aware of the brand but do not consider it.
- **Salience:** Consumers can recall the brand when needed.
- **Performance:** Consumers perceive the brand as meeting or exceeding their functional needs.
- **Imagery:** Consumers develop an emotional connection with the brand.
- **Loyalty:** Consumers prefer the brand over competing brands and are less likely to switch.

**Question 5:** What are some key challenges in strategic brand management?

**Answer:** Challenges in strategic brand management include:

- **Changing consumer behavior:** Keeping up with evolving consumer preferences and expectations.
- **Increased competition:** Navigating a highly competitive market landscape.
- **Digital transformation:** Adapting to the rapid pace of digital technology and its impact on brand communication.
- **Brand sustainability:** Ensuring that brand practices align with ethical and environmental values.

**What is the vas in vietnam accounting?** The Vietnamese Accounting Standards (VAS) is a bookkeeping and financial reporting manual. It provides a standard chart of accounts, financial statements template, accounting books and voucher templates, as well as detailed guidance on accounting double entries for specific transactions.

**What is the difference between vas and IFRS?** IFRS generally has broader coverage and more specific rules across various areas. In contrast, VAS places emphasis on Vietnam-specific issues and includes detailed regulations on taxation and legal provisions.

**When did Vietnam adopt IFRS?** Starting from 2022, enterprises will be able to voluntarily choose to apply IFRS. This is an important stage for entities to experiment, evaluate, and refine the transition process. Mandatory IFRS Adoption Phase (From 2025 onward):

---

HOW TO CREATE ODATA SERVICES FOR ANALYTIC QUERIES SAP

**What is the meaning of vas in accounting?** Value Added Statement (VAS) is actually aimed at supplementing a new dimension to the existing system of corporate financial accounting and reporting through the disclosure of additional information regarding the amount of wealth created by an organization in an accounting period and the way the wealth has been ...

**What is a vas account?** What is VAS? Virtual Account System (VAS) is the solution for leveraging electronic transactions and money management in banks and non-bank industries. The solution supports current trends and the next generation of payment media, for example, QR or tokenization.

**What are vas transactions?** What are Value-Added Services? Some Value-Added Services (VAS) include products such as data, airtime, electricity, vouchers, and tokens. Businesses can add these products alongside their regular products, adding enormous value (hence: Value-Added Services) to both their customers and themselves.

**How is IFRS different from GAAP?** GAAP is a framework based on legal authority while IFRS is based on a principles-based approach. GAAP is more detailed and prescriptive while IFRS is more high-level and flexible.

**How is IFRS different from accounting standards?** What is the Difference Between IAS and IFRS? The Difference Between IAS and IFRS is that IAS stands for International Accounting Standards and IFRS stands for International Financial Reporting Standards. IAS covers only specific accounting issues, while IFRS covers all aspects of financial reporting.

**What is the difference between US GAAP and IFRS lease accounting?** Another key difference between IFRS Standards and US GAAP relates to the treatment of leases whose payments depend on an index or rate – e.g. a lease with payments adjusted annually for changes in the consumer price index (CPI). Under IFRS 16, the lease liability is remeasured each year to reflect current CPI.

**What is the accounting body in Vietnam?** VACPA is a member association of Vietnam Accounting and Auditing Association, subject to management of the Ministry of Finance.

**When did Vietnam ratify UNCLOS?** On June 23, 1994, Vietnam's National Assembly issued the Resolution on the ratification of the UNCLOS, which also clearly affirms Vietnam's position to: “...

**What did IFRS 15 replace?** IFRS 15 replaces IAS 11, IAS 18, IFRIC 13, IFRIC 15, IFRIC 18 and SIC 31. IFRS 15 provides a comprehensive framework for recognising revenue from contracts with customers.

**What is an example of VAS?** Telecommunications: Caller-designed ringtones, mobile banking, data services, mobile advertising, and location-based services. Banking: Online banking, mobile banking, financial advisory services, and personalized customer service.

**What is the concept of VAS?** A value-added service (VAS) is a popular telecommunications industry term for non-core services, or, in short, all services beyond standard voice calls and fax transmissions. However, it can be used in any service industry, for services available at little or no cost, to promote their primary business.

**What are VAS benefits?** One of the primary benefits of VAS is the ability to reduce costs and increase efficiency within the supply chain. For instance, by outsourcing packaging and assembly to a logistics provider, a company can eliminate the need for in-house staff and equipment, saving on labor and overhead costs.

**What is the VAS used for?** A tool used to help a person rate the intensity of certain sensations and feelings, such as pain. The visual analog scale for pain is a straight line with one end meaning no pain and the other end meaning the worst pain imaginable.

**What is VAS in banking?** Value Added Services (VAS) are non-banking services that add value. Banks are implementing such services into their offer in order to stand out from their competitors and raise the attractiveness of traditional banking services, which form the basis of their offer.

**What are VAS costs?** Updated on March 19th, 2024. Value-added service fees are used to bill your customers for additional processes and services that are fulfilled on the inbound of product, such as palletization of loose material, labeling and sorting

HOW TO CREATE ODATA SERVICES FOR ANALYTIC QUERIES SAP

products, and unloading containers.

**What are VAS payments?** What are Value-Added Services in Payments? In the context of the payments industry, value-added services can describe any features or solutions that go beyond the minimum requirements of processing and handling payments.

**What is VAS revenue?** Offered by a network or its resellers; a value-added service (VAS) generates additional revenue by offering increased benefits to subscribers. Total VAS revenue is calculated from the total of SMS, data-over-cellular and information-service revenue.

**What does VAS do?** A virtual assistant is a remote administrative assistant who works for a company or individual on a self-employed, or contract basis. A virtual assistant helps with office management work but can also tackle a variety of writing, editing, design, marketing and social media-related activities.

**What are vas payments?** What are Value-Added Services in Payments? In the context of the payments industry, value-added services can describe any features or solutions that go beyond the minimum requirements of processing and handling payments.

**What is vas revenue?** Offered by a network or its resellers; a value-added service (VAS) generates additional revenue by offering increased benefits to subscribers. Total VAS revenue is calculated from the total of SMS, data-over-cellular and information-service revenue.

**What does VCS mean in Vietnam?** The Vietnam Championship Series (VCS) is a professional League of Legends esports league run by Riot Games and VNG Games - a subsidiary of VNG Corporation since 2022 after Garena stopped publishing League of Legends and its major competitions in Vietnam.

**What is the VAS annual budget?** The U.S. Department of Veterans Affairs (VA) is requesting a total of \$369.3 billion in fiscal year (FY) 2025, a 9.8 percent increase above FY 2024 estimated levels. The FY 2025 budget provides robust funding for the Secretary's top priorities.
