Unit 1 Investment Environment Mock Exam: CFA UK

Question 1:

Identify the three main categories of economic resources.

Answer:

1. Land (natural resources)
2. Labor (human resources)
3. Capital (produced resources)

Question 2:

Explain the concept of market efficiency and its implications for investors.

Answer:

Market efficiency refers to the degree to which security prices reflect all available information. In an efficient market, investors cannot consistently outperform the market by buying and selling stocks based on publicly available information. This has implications for investment decision-making, as investors should focus on asset allocation and diversification rather than trying to time the market.

Question 3:

Describe the role of the Federal Reserve (Fed) in regulating the US economy.

Answer:

The Fed is the central bank of the United States. It plays a crucial role in regulating the economy by setting interest rates, controlling the money supply, and supervising financial institutions. The Fed's primary objective is to maintain price stability and maximum employment.

Question 4:

Explain the relationship between inflation and interest rates.

Answer:

Inflation is a measure of the increase in the general price level over time. Interest rates are the cost of borrowing money. When inflation is high, investors demand higher interest rates to compensate for the loss in purchasing power due to inflation. As a result, central banks typically raise interest rates to combat inflation.

Question 5:

Discuss the ethical responsibilities of investment professionals.

Answer:

Investment professionals have a fiduciary duty to their clients. This requires them to act in the best interests of their clients, put their clients' interests before their own, and avoid conflicts of interest. Ethical responsibilities also include adhering to the codes of conduct and regulations set by regulatory bodies, such as the CFA Institute Code of Ethics and Standards of Professional Conduct.
