---

**What is the passing percentage of Class 12 MP board?** MP board 12th Result 2024 Highlights For Class 12th, the pass percentage stands at a commendable 64.49%, indicating that nearly two-thirds of the students who appeared for the examination have successfully cleared it.

### **Téléchargez Gratuitement le Guide de Dessinateur Industriel le Plus Complet**

#### **Question 1 : Où puis-je trouver un guide gratuit de dessinateur industriel ?**

**Réponse :** Vous pouvez télécharger le "Guide de Dessinateur Industriel Gratuit" en cliquant sur le lien suivant : [lien de téléchargement]. Ce guide complet fournit des informations précieuses et des conseils pratiques pour les débutants et les professionnels souhaitant perfectionner leurs compétences en dessin industriel.

#### **Question 2 : Que contient ce guide ?**

**Réponse :** Le guide aborde tous les aspects essentiels du dessin industriel, notamment :

- Principes de base du dessin industriel
- Techniques d'esquisse et de rendu
- Modélisation 3D et conception assistée par ordinateur
- Tolérances et ajustement
- Normes et spécifications industrielles

#### **Question 3 : Est-ce que ce guide est adapté aux débutants ?**

**Réponse :** Oui, ce guide est parfaitement adapté aux débutants. Il commence par les concepts fondamentaux et progresse progressivement vers des sujets plus complexes. Les illustrations détaillées et les exemples pratiques facilitent la compréhension des concepts.

#### **Question 4 : Quel est le format du guide ?**

**Réponse :** Le guide est disponible au format PDF téléchargeable. Vous pouvez l'imprimer ou le lire sur votre ordinateur ou votre appareil mobile.

### **Question 5 : Quels sont les avantages de l'utilisation de ce guide ?**

**Réponse :** Utiliser ce guide peut vous aider à :

- Maîtriser les principes et les techniques du dessin industriel
- Améliorer vos compétences en esquisse, rendu et modélisation 3D
- Comprendre les normes et spécifications industrielles
- Développer les compétences nécessaires pour une carrière réussie en dessin industriel

### **Strategic Management, Competitiveness, and Globalization: Key Concepts and Cases**

#### **Question 1: Define strategic management and its importance.**

**Answer:** Strategic management is the process of formulating and executing long-term plans to achieve organizational goals. It involves analyzing external and internal environments, setting objectives, and allocating resources to create a competitive advantage. Strategic management is crucial for organizations to succeed in a rapidly changing global marketplace.

#### **Question 2: Explain the concept of competitiveness and how it is achieved.**

**Answer:** Competitiveness refers to an organization's ability to perform better than its rivals. It is achieved through various strategies, including:

- Differentiation: Offering unique products or services
- Cost leadership: Providing products or services at a lower cost
- Focus: Specializing in a particular market segment

#### **Question 3: How does globalization impact strategic management?**

**Answer:** Globalization has significantly altered the competitive landscape by:

- Increasing interdependence among nations
- Creating global markets and supply chains

- Fostering cross-cultural collaboration

Organizations must adapt their strategic management approaches to remain competitive in a globalized economy.

**Question 4: Analyze a case study of a successful globalized company.**

**Answer:** Apple Inc. is a prime example of a successful globalized company. It has achieved competitiveness by:

- Creating innovative products that appeal to a global audience
- Establishing a strong brand reputation
- Building an efficient global supply chain

**Question 5: Discuss the challenges and opportunities of globalization.**

**Answer:** Globalization presents both challenges and opportunities for organizations. Key challenges include:

- Increased competition
- Cultural and language barriers

Opportunities include:

- Expanded market reach
- Access to global resources
- Economies of scale

**What were each of the two Maya calendars based on?** Maya monuments that have Long Count dates often include dates from other types of calendars. The two most important of these time cycles are the tzolk'in, a 260-day cycle that may be based on the duration of a human pregnancy, and the haab, a calendar that approximates the solar year.

**What was one of the Maya gods?** 1. Kukulcán – The Feathered Serpent God. The feathered serpent deity, known to the Yucatec Maya as Kukulcán, is the most well-known and prominent Mayan god of the Maya pantheon. You will also see this god

referred to as Gucumatz in the Quiche Maya designation and as Quetzalcoatl in the Aztec Nahuatl language.

**How accurate was Mayan astronomy?** The Maya accurately calculated times when the sun would rise and set, and even more amazing, they determined the length of the solar year to be 365 days. Mayan cities all show signs of astronomical orientation in the construction of buildings.

**Which planet or star is crucial to the Mayan calendar?** Venus. Venus was extremely important to the people of Mesoamerica. Its cycles were carefully tracked by the Maya. The Maya associated the planet Venus with war, and battles would be arranged to align with the movements of Venus.

**What did the Mayans accurately predict?** The Dresden Codex, one of the four remaining ancient Maya texts, dates to the 11th century. Its pages contain a wealth of astronomical knowledge and religious interpretations and provide evidence that the Maya could predict solar eclipses.

**Did the Mayans have 3 calendars?** The Mayan calendar consists of three separate calendars that are used simultaneously: the Long Count, the Tzolkin (divine calendar) and the Haab (civil calendar). The latter two calendars identify days; the Long Count identifies the years.

**Who is the god of the Mayan calendar?** By the Maya mythological tradition, as documented in Colonial Yucatec accounts and reconstructed from Late Classic and Postclassic inscriptions, the deity Itzamna is frequently credited with bringing the knowledge of the calendrical system to the ancestral Maya, along with writing in general and other foundational ...

**Who is the most powerful Mayan god?** While Gucumatz was the most popular god, Hunab-Ku is considered the supreme deity of the pantheon of the Maya, known as 'Sole God'.

**How many Mayan gods are there in total?** Incredibly sophisticated and hugely alien to the modern world, the Maya believed the universe was made up of three parts: the earth (kab), the sky (kan) and the underworld (xibalba). They also had a pantheon of gods which related to every aspect of life: some historians estimate that

in total, there were over 200 gods.

**Who are the descendants of the Mayans?** Today, their descendants, known collectively as the Maya, number well over 6 million individuals, speak more than twenty-eight surviving Mayan languages, and reside in nearly the same area as their ancestors. The Archaic period, before 2000 BC, saw the first developments in agriculture and the earliest villages.

**How did the Mayans know there were 365 days in a year?** The Haab is composed of 18 months made of 20 days, and one month, made of 5 days. This 5-day month is called "Wayeb." Thus,  $18 \times 20 + 5 = 365$  days. This image shows the hieroglyphs corresponding to the nineteen months of the Haab calendar. The Maya represented some of these months using more than one glyph.

**What is the Mayan 52 year cycle?** The calendar was based on a ritual cycle of 260 named days and a year of 365 days. Taken together, they form a longer cycle of 18,980 days, or 52 years of 365 days, called a "Calendar Round."

**Why did the Mayans disappear?** Drought theory. The drought theory holds that rapid climate change in the form of severe drought (a megadrought) brought about the Classic Maya collapse. Paleoclimatologists have discovered abundant evidence that prolonged droughts occurred in the Yucatán Peninsula and Petén Basin areas during the Terminal Classic.

**What religion did the Mayans believe in?** The Maya had a polytheistic religion, which means they worshipped many gods, including Itzam Na (Creator God), Kinich Ahau (Sun God), Ah Puch (one of several death gods), and Buluc Chabtan (War God). They practiced animism, which is the belief that all things, including inanimate objects, had a soul.

**Who created the calendar, Aztecs or Mayans?** Answer and Explanation: The Maya invented one of several calendars used by pre-Columbian peoples. The Aztecs also invented a calendar, but their civilization rose after the Mayan culture had declined. The Aztec calendar, like the Mayan one, consisted of 365 days.

**What did the Mayans based their calendar on?** Mayan calendar, dating system of the ancient Mayan civilization and the basis for all other calendars used by

Mesoamerican civilizations. The calendar was based on a ritual cycle of 260 named days and a year of 365 days.

**What are the 2 components of the Mayan calendar?** The Maya calendar consists of several cycles or counts of different lengths. The 260-day count is known to scholars as the Tzolkin, or Tzolk'in. The Tzolkin was combined with a 365-day vague solar year known as the Haab' to form a synchronized cycle lasting for 52 Haab' called the Calendar Round.

**What was the Maya solar calendar based on?** The Maya agricultural 365-day calendar is a reflection of the yearly solar cycle. The Maya ceremonial 260-day calendar is connected to the relationships between the agricultural calendar, the zenith passage of the Sun, and the time it takes corn to mature.

**What two main calendars were developed and used by the Maya Why are these calendars important achievements in mathematics and astronomy?** The Maya had two calendars. One of these was a ritual calendar, known as the Tzolkin, composed of 260 days. It contained 13 "months" of 20 days each, the months being named after 13 gods while the twenty days were numbered from 0 to 19. The second calendar was a 365-day civil calendar called the Haab.
