How did the scandals of the Grant Administration and the economic problems of the 1870s affect northern attitudes toward Reconstruction? The North's Retreat Despite the Grant administration's effective response to Klan terrorism, the North's commitment to Reconstruction waned during the 1870s. Many Radical leaders passed from the scene, their place taken by politicians less committed to the ideal of equal rights for black citizens.

Which of the following contributed to the collapse of Reconstruction? Paramilitary White-supremacist terror organizations in the South helped bring about the collapse of Reconstruction, using violence as their primary weapon. The "Invisible Empire of the South," or Ku Klux Klan, stands as the most notorious.

What was the response to the exposure of widespread corruption in the grant administration? Democrats denounced "foreign" rule of the South by carpetbaggers

and attacked corruption in President Grant's administration. In 1872, "Liberal Republicans," repelled by the supposed corruption of the radical regimes in the South, declared that the North had attained its goals and that Reconstruction should end.

How did the Republican governments in the South attempt to rebuild the region? These governments established the region's first public school systems, enacted civil rights laws, and sought to promote the region's economic development. The coming of black suffrage under the Reconstruction Act of 1867 produced a wave of political mobilization among African Americans in the South.

What was the cause of the collapse of the Reconstruction? The combination of white intimidation, a significant economic depression in the South, and the Democratic Party winning control of the House of Representatives in 1874, resulted in Reconstruction beginning to fade away.

What effect did the collapse of Reconstruction in 1878 have on the United States? The Compromise of 1877 effectively ended the Reconstruction era. Southern Democrats' promises to protect the civil and political rights of Black people were not kept, and the end of federal interference in southern affairs led to widespread disenfranchisement of Black voters.

What was the main reason Reconstruction failed? The violence caused Reconstruction to fail, and the victorious white supremacists embedded structural racism into the post-Reconstruction political and social system in the South. Reconstruction's failure illustrates the dangers of half measures.

What was the main cause for the end of Reconstruction? While many factors led to the end of Reconstruction, the official end is generally attributed to the Compromise of 1877. The compromise resulted from a long process that included political turmoil, continuing division over race, and economic difficulties.

What was the impact of the Compromise of 1877 that ended Reconstruction on African Americans? It marked a significant setback for the civil rights movement and racial equality in the United States. The compromise allowed for the institutionalisation of racism and segregation in the South, which would persist for nearly a century until the Civil Rights Movement of the 1960s.

Why is Grant's administration known as the administration of scandals? Grant was influenced by political forces of both reform and corruption. The standards in many of his appointments were low, and charges of corruption were widespread. At times, however, Grant appointed various cabinet members who helped clean up the executive corruption.

What were the failures of the Grant administration? During his presidency Grant experienced cases of fraud and governmental mismanagement, while his attempts to reunify the South with the North while trying to protect Civil Rights for African-Americans during the Reconstruction era were met with both praise and criticism, socially and historically.

Why did Congress' Reconstruction efforts to ensure equal rights to the Freedmen fail? Final answer: Congress' Reconstruction efforts to ensure equal rights to freedmen failed due to President Johnson's confrontational approach, persistent racism and violence in the South, and the weakening support for Reconstruction within the Republican Party.

How did freedmen adjust to freedom? Special boards were established to set up schools for African Americans in the South, and black and white teachers from the North and South worked to help young and old become literate. Some African Americans in the South were encouraged to move to Northern cities where jobs would be available.

How did scalawags and Carpetbaggers differ? Carpetbaggers also worked as teachers, merchants, businessmen, or at the Freedman's Bureau, an organization created by Congress to provide aid for newly liberated Black Americans. Scalawags were white southern Republicans who backed the policies of Reconstruction rather than opposed them.

What were the positives of the Reconstruction? Serving an expanded citizenry, Reconstruction governments established the South's first state-funded public school systems, sought to strengthen the bargaining power of plantation labourers, made taxation more equitable, and outlawed racial discrimination in public transportation and accommodations.

How did the South react to Reconstruction? The South, however, saw Reconstruction as a humiliating, even vengeful imposition and did not welcome it. During the years after the war, black and white teachers from the North and South, missionary organizations, churches and schools worked tirelessly to give the emancipated population the opportunity to learn.

Why did the Reconstruction of the South collapse? Paramilitary white-supremacist terror organizations in the South helped bring about the collapse of Reconstruction, using violence as their primary weapon. The “Invisible Empire of the South,” or Ku Klux Klan, stands as the most notorious.

Were sharecroppers slaves? Initially, sharecroppers in the American South were almost all formerly enslaved black people, but eventually cash-strapped indigent white farmers were integrated into the system. During Reconstruction, the federal Freedmen's Bureau ordered the arrangements for freedmen and wrote and enforced their contracts.

How did Reconstruction attempt to change the Southern economy? Southern agriculture gradually changed and improved. New methods of farming allowed people in the South to raise larger crops. Northerners invested large sums of money to build railroads and factories in the South. As a result, people began moving from the farms to the cities looking for jobs.

How was the South redeemed when Reconstruction ended? The Redeemers opposed Reconstruction through legal means, such as poll taxes, and through violent paramilitary groups, such as the Ku Klux Klan. These tactics successfully prevented Black men from voting and ensured that Democrats would regain control of Southern states.

What were the social and political effects of radical Reconstruction in the South? The Radical Republican takeover of Reconstruction in 1867 produced a mixed bag of results for the people of the South. On one hand, rights and opportunities for African Americans reached a pinnacle, and many former slaves held bright hopes for the future. The South's economy seemed to be improving, too.

What were some of the major scandals that occurred in Grant's administration?

Why did northern support for Reconstruction decline during the 1870s?

Explanation: During the 1870s, Northern support for Reconstruction began to wane. This decline in support was due to several factors. The Panic of 1873, an economic depression, shifted the focus of many Americans from the issues of the Reconstruction to the more immediate concerns of economic recovery.

How did the Panic of 1873 influence northern attitudes toward Reconstruction? The Panic of 1873 had a significant impact on Northern attitudes toward Reconstruction. The correct answer is C. Northerners did not want to spend any more on Reconstruction.

How did the depression of 1873 affect Reconstruction? The Depression of 1873 had a significant impact on Reconstruction. The economic downturn weakened Northern support for Reconstruction policies as many Americans wanted national leaders to address more immediate economic concerns.
