What are the 4 models of organizational behavior? Many models of organisational behaviour have emerged during the last 100 years or so, and four of them are significant in contributing to our understanding of frameworks that organisations operate out of. These are Autocratic, Custodial, Supportive, and Collegial.

The most widely accepted model of OB consists of three interrelated levels: (1) micro (the individual level), (2) meso (the group level), and (3) macro (the organizational level). The behavioral sciences that make up the OB field contribute an element to each of these levels.

interact with each other and how they can be optimized to achieve better results.

What are the limitations of OB? Some of the limitations of Organizational Behavior are - 1. Organizational behaviour cannot abolish conflict and frustration but can only reduce them. It is a way to improve but not an absolute answer to problems. 2. It is only one of the many systems operating within a large social system.

What are the 4 C's of behavior? The cornerstones of the MTQ48 measure are the 4 C's of Control, Commitment, Challenge and Confidence. Each of these scales reflects a component of the Mental Toughness personality trait and any given score will suggest the likely behaviours of the individual.
