What are the 5 points test given by Collis and Montgomery? Resources are only valuable to a strategy if they pass 5 tests: the test of inimitability (hard to copy) 2. test of durability (does not depreciate quickly) 3. test of appropriability (profits from the resource go to the company) 4. test of substitutability (hard to be trumped by another resource) and 5.

What is an example of a resource-based view company? The competition between Apple Inc. and Samsung Electronics is a good example of RBV of strategy. A RBV perspective focuses inwardly on the firm's resources and capabilities to enhance its competitive advantage (Barney, 1991; Penrose, 1959; Peteraf, 1993). The RBV approach helps us understand how firms achieve and sustain competitive advantage through

resource building as well as leveraging the existing resources.

The Resource-Based View (RBV) of competitive advantage provides a theoretical framework from the field of strategic management for assessing the competitive advantages of family firms. The RBV isolates idiosyncratic resources that are complex, intangible, and dynamic within a particular firm.
