The density of a 10% sodium bicarbonate solution is approximately  $1.07 \text{ g/cm}^3$ . This means that 1 liter of a 10% sodium bicarbonate solution weighs approximately 1.07 kg.

### **4. What are the factors that affect the density of sodium bicarbonate solution?**

The density of sodium bicarbonate solution is affected by the following factors:

- Concentration of the solution
- Temperature of the solution
- Presence of other dissolved substances

## 5. What are the applications of sodium bicarbonate solution?
