and pay close attention to the distribution (and maldistribution) of diseases and resources promoting health.

**What are the issues of medical anthropology?** Medical anthropologists study such issues as: Changing body projects and valued bodily attributes. Perceptions of risk, vulnerability and responsibility for illness and health care. Risk and protective dimensions of human behavior, cultural norms and social institutions. Preventative health and harm reduction practices.

**What are the prerequisites for EASA type rating?**

**What are the aircraft categories in EASA?** In EASA states, "Category of aircraft" means a categorisation of aircraft according to specified basic characteristics. Examples include aeroplane, powered-lift, helicopter, airship, sailplane, and free balloon.

**What are the requirements for CPL license in EASA?** Applicants for a Commercial Pilot Licence must be at least 18 years old, hold a valid EASA Part-FCL Class 1 Medical Certificate, have met the specified practical and theoretical training requirements laid down in EASA Part-FCL: including at least 200 hours' flying time, including 100 hours flying experience acting as ...

**How to get EASA cabin crew attestation?** You can renew your certification by completing an adapted training program that is shorter and less costly than the initial

training. After successfully passing the exam, you will obtain the CABIN CREW ATTESTATION Issued in accordance with the official EASA Form 142 Issue 1.
