What are Judith Weston's verbs for directing actors? An abbreviated list of action verbs offered by acting-directing teacher Judith Weston includes accuse, cajole, charm, complain, compliment, dazzle, demand, flatter, incite, knife, nail, persuade, pry, punish, ridicule, scrutinize, seduce, soothe, stalk, and warn (302–03).

What is a great way for the directors and actors to build trust? Cultivate Open Communication. Just as with any relationship, effective communication is fundamental to building a strong rapport between actors and directors. This is as much a necessity for new actors as experienced ones.

What is the director's relationship to their actors? The relationship between director and actor is one of the most sacred in all of filmmaking. Both director and actor are artists, and together they collaborate on a project that is bigger than either one of them.

What are directors looking for in an actor? Casting directors look for actors who can nail their auditions by delivering strong, confident, and well-prepared performances. This means knowing your lines, understanding the character, and making bold choices that stand out.

What makes great directing? Directors must be able to turn the script into a compelling story. The script may read as boring and ordinary, but a director's vision will turn those boring storylines into amazing scenes that will take it to a whole new level.

What makes a good acting director? Listen more than you talk. If you have a strong and confident vision of your story, you do not need to be fearful of the actors' ideas. Instead of telling the actors that their ideas are wrong, you can build on what the actors give you, to guide them to your vision without shutting them down. Be flexible.

How do directors approach actors? Instead of telling your actors what emotion they should be expressing, help them find that emotion. Take some time to discuss why the character feels the way they are feeling. Or, try giving them a memory or image to help them. Another method is to examine the character's objective with the actor.

What are the four characters a great director should possess and why? There are other nice-to-have qualities that seem, since I wrote this previous post (many many years ago), not to be as essential. These four qualities – care, vision, openness and decisiveness – really do make for great directors.

How to speak to actors when directing? Don't talk too much. Many directors make the mistake of spending a great deal of time telling the actor or actors what they are looking for. I think it is better to suggest ideas, ask questions, and try to imagine what working with this actor day in and day out might be like.
