**How to be interesting review?**

**How do I start being an interesting person?**

**How to be more interesting book summary?** Being interesting is nothing to do with intelligence, beauty or confidence. It is actually a state of mind. In *How to be More Interesting*, lateral-thinking guru Edward de Bono reveals how playing with ideas, making connections, speculating and using the imagination are at the heart of being an interesting person.

**How can I be interesting and exciting?** Ask good questions At a party, you don't need to say much about yourself for people to believe you're interesting. Instead, engage them in deep conversation about their lifestyle. "Ask thoughtful (not prying) questions, as needed, about them and their interests and priorities," says Stephanie Vardavas.

**How can I make something interesting?** Now, if you're dealing with a seemingly boring topic, try applying these seven traits: simplicity, unexpectedness, concreteness, credibility, emotion, storytelling, and specificity. Hobbies can also introduce you to new people who share your hobby.

Challenge yourself to learn something from the text.

**What makes reading more interesting?** Dialogue adds life to a story, so scan a book before you read and follow the implied stage directions. If a character shouts, raise your voice! If he speaks in a stern voice, do the same. Vary your subject matter as well as the kinds of things you read.

**How can I make myself an interesting person?** STOP SCROLLING... and actually read (not skim) books and blogs, listen to podcasts, learn a new skill, write as much as you can, travel and actually immerse yourself into cultures, and talk to locals. Even reading fiction will open you up to new worlds and ideas and make you a more empathetic and interesting person.
