Why We Do What We Do: Understanding Self-Motivation with Edward L. Deci

Why is understanding self-motivation important?

Self-motivation is the key to achieving success and fulfillment in life. It drives us to pursue our goals, overcome obstacles, and strive for excellence. By understanding our own motivations, we can harness this powerful force and live more meaningful and productive lives.

What are the two main types of motivation?

Edward L. Deci, a renowned psychologist, has identified two main types of motivation: intrinsic and extrinsic. Intrinsic motivation comes from within and is driven by a desire for personal growth, creativity, and challenge. Extrinsic motivation, on the other hand, arises from external factors such as rewards, punishments, or social approval.

How does intrinsic motivation differ from extrinsic motivation?

Intrinsic motivation is more sustainable and leads to greater long-term success. When we are intrinsically motivated, we enjoy the task itself and are more likely to persist even when faced with setbacks. Extrinsic motivation, while effective in the short term, can lead to burnout and loss of interest if the external rewards are removed.

What are some factors that promote intrinsic motivation?

According to Deci, there are three key factors that foster intrinsic motivation: autonomy (feeling control over our actions), competence (experiencing success), and relatedness (feeling connected to others). When these conditions are met, we are more likely to be intrinsically motivated and engaged in our work.

How can we apply this knowledge to our own lives?

Understanding the principles of self-motivation can help us cultivate a mindset that promotes intrinsic motivation. By seeking activities that provide autonomy, competence, and relatedness, we can create a fulfilling and enjoyable life for ourselves. Additionally, we can support others in finding their intrinsic motivation by providing them with opportunities for growth, challenge, and connection.

When the Moon Split: An Exegesis by Safiur Rahman Mubarakpuri

Question: Did the moon physically split in half during the time of the Prophet Muhammad (PBUH)?

Answer: According to Safiur Rahman Mubarakpuri, a renowned Islamic scholar and author of "The Sealed Nectar", the answer is yes. Mubarakpuri, citing numerous early Islamic sources including the Quran, Hadith, and the historical works of Ibn Hisham and Ibn Ishaq, presents compelling evidence to support the occurrence of the moon's splitting.

Question: What is the Quranic basis for the moon's splitting?

Answer: The Quran mentions the moon's splitting in Surah Al-Qamar (The Moon), verse 1: "The Hour has drawn near, and the moon has split." Mubarakpuri explains that this verse clearly indicates the literal splitting of the moon, not a metaphorical or figurative event.

Question: How did the witnesses describe the event?

Answer: Mubarakpuri quotes various eyewitness accounts from the time of the Prophet Muhammad (PBUH), including those of Abu Talib, Abu Bakr, and Anas bin Malik. These witnesses described seeing the moon split into two halves, which moved apart and then came back together.

Question: What is the historical significance of the moon's splitting?

Answer: Mubarakpuri emphasizes the importance of the moon's splitting as a miracle that confirmed the Prophethood of Muhammad (PBUH). It also challenged the pagan beliefs of the Quraish, who claimed that the moon was an idol.

Question: Does modern science support the moon's splitting?

Answer: Mubarakpuri discusses theories proposed by some geologists and astronomers to explain the possible causes of the moon's splitting, such as a volcanic eruption, an earthquake, or a meteorite impact. However, he concludes that while these theories may offer plausible explanations, the ultimate cause of the moon's splitting remains a mystery known only to Allah.
