Who Was Jesus? A Conspiracy in Jerusalem

By Kamal S. Salibi

Paragraph 1: The Conspiracy Question

Did the crucifixion of Jesus occur as the Gospels narrate? Or was it a conspiracy orchestrated by the Sanhedrin, the Jewish ruling council, at the behest of the Roman prefect, Pontius Pilate? Kamal S. Salibi, a prominent Lebanese historian, presents a controversial theory that challenges the traditional Gospel accounts.

Paragraph 2: Salibi's Theory

Salibi argues that the Sanhedrin, concerned about Jesus' growing popularity and possible threat to their authority, conspired with Pilate to have him arrested and executed. They feared that Jesus' teachings could incite a popular uprising against Roman rule. Pilate, motivated by political expediency, agreed to the conspiracy to appease the Jewish leaders.

Paragraph 3: Evidence from the Gospels

Salibi points to several inconsistencies and contradictions in the Gospel accounts of the crucifixion as evidence of a conspiracy. For example, he highlights the differing accounts of the day of the crucifixion, the precise location, and the reasons given for Jesus' arrest. These variations, he argues, suggest that the Gospels were altered or fabricated to support a particular narrative.

Paragraph 4: Alternative Motives

Salibi also proposes alternative motives for Jesus' death. He suggests that Jesus may have been killed by a faction within his own movement, either out of jealousy or disagreement with his teachings. Additionally, Salibi argues that the Romans may have executed Jesus as a political threat, believing that his preaching could undermine their authority in Judea.

Paragraph 5: Implications of the Theory

Salibi's theory has raised significant controversy and debate among historians and theologians. If true, it would have profound implications for our understanding of the historical Jesus, the origins of Christianity, and the nature of the Roman-Jewish relationship in the first century. However, it is important to note that Salibi's theory remains speculative and is not widely accepted by the scholarly consensus.
