By Megan McArdle

Failure is often seen as a negative, something to be avoided at all costs. However, research shows that failing well can actually be key to success. In her book, "The Upside of Down," author Megan McArdle argues that failure is an essential part of the learning process and that it can help us develop the resilience, creativity, and problem-solving skills necessary for success.

Q: Why do we tend to avoid failure?

A: Failing can help us learn from our mistakes, develop resilience, and become more creative. It can also help us to become more humble and to appreciate the value of success. Research has shown that people who have failed are more likely to be successful in the long run than those who have never failed.

Q: How can we fail well?

A: To fail well, it is important to:

- Be honest with ourselves about what went wrong.
