What is a MK5 standard controller? The MK5 Controller is a control system option for a single Smoke or Fire Curtain. The MK5 system uses Smoke / Fire Curtains with 24Vdc permanent magnet electrical motor fitted with an internal 24Vdc electromagnetic brake, as standard.

What is MK5 engine? The MK5 Volkswagen Golf was originally equipped with a 2.5-liter five-cylinder that produces 150 horsepower. Stock, it's capable of reaching 60 miles per hour in nine seconds while topping out at 130 mph. However, this car has a 2.5-liter turbocharged five-cylinder under the hood.

What is the difference between standard controller and custom controller? Custom controllers are more powerful than standard controllers and allow you to add custom logic by defining an apex class. Custom controllers can display data from multiple objects, process complex data, and even call Apex code.

What is an MK4? MK4: Jetta, Golf, GTI and New Beetle This is the 4th generation "A" size chassis that applies to many of the products we sell. These cars are also commonly referred to "A4" cars but since we also sell products for the Audi A4 we prefer to call these cars MK4 which is a shortened version of Mark 4 or fourth generation.

What is Mk5 vs MK6? MK6 has the newer TSI engine which is a better engine. More power, torque and more fuel efficiency. The mk6 is basically a mild facelift of the mk5 rather than an all new model so it's not really surprising that prices are pretty similar.

Who makes the Mk5?

What is the difference between controller and control panel? Control panel consist of a controller. Controller may be PLC, DCS, relay or some other type. It gives digital signal input signal to the MCC panel to start the motor. Control panel works based on the PLC /DCS program or the relay logic.

Why is controller better than PC? Control Comparison For many people, one of the most prevalent differences is comfort and ease of access. A keyboard and mouse might be an efficient set of tools for working and playing games, but they aren't necessarily designed to fit in your hands like a controller, and aren't usually as portable.

What are the three basic types of controllers? There are three basic types of controllers: on-off, proportional and PID. Depending upon the system to be controlled, the operator will be able to use one type or another to control the process.

What is standard controller in visual force? A Visualforce controller is a set of instructions that specify what happens when a user interacts with the components specified in associated Visualforce markup, such as when a user clicks a button or link.

What is standard list controller? A standard list controller enables you to create Visualforce pages that can display or act on a set of records. Examples of existing Salesforce pages that work with a set of records include list pages, related lists, and mass action pages.
