Study Guide: Macroeconomics by Olivier Blanchard, 5th Edition

Q1: Define aggregate demand (AD) and list its key components. A: AD is the total demand for goods and services in an economy. Its components are consumption, investment, government spending, and net exports.

Q2: Explain the concept of the Phillips curve and its implications for policymakers. A: The Phillips curve shows an inverse relationship between inflation and unemployment. A lower unemployment rate typically leads to higher inflation. This trade-off poses challenges for policymakers trying to balance economic growth with price stability.

Q3: Discuss the role of monetary policy in managing the economy. A: Monetary policy is conducted by the central bank, which influences short-term interest rates. Higher interest rates can curb inflation by reducing aggregate demand, while lower rates can stimulate growth by encouraging borrowing and spending.

Q4: Describe the determinants of economic growth and discuss the concept of the Solow growth model. A: Economic growth is driven by factors such as technological progress, capital accumulation, and labor force growth. The Solow growth model suggests that economies eventually reach a steady state growth rate determined by these factors.

Q5: Analyze the impact of external shocks on an economy and discuss potential policy responses. A: External shocks, such as changes in global demand or oil prices, can significantly impact an economy. Policymakers may consider fiscal policy or other measures to mitigate the effects of these shocks and stabilize the economy.
