What's the hardest form of math?

What do you say at the end of a mathematical proof? o Write "End of proof"; o Write "QED". This is Latin for "quod erat demonstrandum", and means "What was to be demonstrated"; o Use the symbol " \square " at the end of the last line of your proof.

What are the three dots in a proof? In logical argument and mathematical proof, the therefore sign, \therefore , is generally used before a logical consequence, such as the conclusion of a syllogism. The symbol consists of three dots placed in an upright triangle and is read therefore.

What is Q.E.D. in math? "Q.E.D." (sometimes written "QED") is an abbreviation for the Latin phrase "quod erat demonstrandum" ("that which was to be demonstrated"), a notation which is often placed at the end of amathematical proof to indicate its completion.

What does QED explain? In technical terms, QED can be described as a very accurate way to calculate the probability of the position and movement of particles, even those massless such as photons, and the quantity depending on position (field)

of those particles, and described light and matter beyond the wave-particle duality proposed by ...

What is an example of QED? "Well, I didn't write it down, QED it didn't happen." Our reigning legal philosophy at work. People will ironically use Q.E.D. at the end of a statement as if they've made an argument ... though it's just their opinion.

How do you write QED at the end of a proof? o Write "QED". This is Latin for "quod erat demonstrandum", and means "What was to be demonstrated"; o Use the symbol "□" at the end of the last line of your proof.

Is QED the same as Hence Proved? As you know "QED" means "quod erat demonstrandum", that is "what was to be shown". It makes proofs more readable. Modern textbooks often conclude proofs with "which concludes the proof" or "which proves the assertion" or something. It's the same thing, "QED" and the square are just convenient shorthands.
