If they don't, have them sit back down and try it again.

It's all very well when individuals can sing confidently, but if certain voices are sticking out, it's not a choir anymore – it's just a group of soloists! Blending well can be achieved in two ways: Balance and Tone Quality.

**What does the Bible say about choir?** Romans 15:6 In-Context 6 Then we'll be a choir - not our voices only, but our very lives singing in harmony in a stunning anthem to the God and Father of our Master Jesus! 7 So reach out and welcome one another to God's glory. Jesus did it; now you do it!

Focus on the meaning of the music. Church music is not just about singing notes and harmonies but about conveying a message and connecting with the congregation.

**What are the golden rules of singing?** Harness your breath to sing louder and softer without strain. Sharpen your technique for precise entry onto notes. Increase your agility to nail riffs and runs with fast-paced scale exercises. Sing mindfully by analyzing what feels good to your vocal cords and what sounds good to your stylistic ear.

**What are the rules for chorales?** The basic rule when writing a chorale melody is that the top three parts should generally be as close as possible. If there is a large gap it should be between the bass and the tenor parts.

**What are the rules for choral reading?** In choral reading, the teacher leads the reading of a text that students have read previously with 95% accuracy, and students join in to orally read the text in unison. The text is then read repeatedly, until the group has achieved strong fluency, demonstrating appropriate rate, accuracy, and prosody.

**What a choir member should know?** You should know how to sing a musical line in unison with your own section. Part Independence. You should learn to sing your part against the other parts, without distraction, and without switching from your part to theirs. This skill makes a huge difference in who can sit/stand where in a chorus.
