**Why is Dodge discontinuing the caravan?** In simple terms, consumer tastes shifted, and minivans stopped selling as well as they once did. FCA's decision to end the Grand Caravan's production was strictly economical, with its 2020 statement saying, "This decision comes as the company works to align volumes with demand."

**What year is the most reliable Dodge Caravan?** The Dodge Grand Caravan is a reliable minivan with a 3.5 out of 5.0 reliability rating from RepairPal. The Dodge Grand Caravans with the best reliability are the 2020, 2007, and 2010 models.

**How many miles can a Dodge Caravan last?** Typically, a Dodge Grand Caravan will survive 200,000-300,000 miles with excellent care, which places high mileage for the vehicle around the 200,000-mile mark and good mileage at 150,000 miles. Anything better than these numbers is a testament to your effort.

**How many miles can a Dodge Caravan go on a full tank?**

**What vehicle is replacing the Dodge Grand Caravan?** Its replacement will be the Chrysler Voyager, which is an entry-level version of the Chrysler Pacifica minivan, and will offer similar pricing and features to its Grand Caravan predecessor. In Canada, a version similar to the Pacifica will be sold as the Chrysler Grand Caravan.

**Are Dodge Caravans known for transmission problems?** A common problem customers experience with their Dodge Grand Caravan is delayed transmission engagement and hard shifting when driving. **Is used Dodge Caravan a good car?** Although there are some troublesome years for the Dodge Caravan, it's generally a dependable vehicle option if you're interested in a minivan. Some of the newest versions even prove more reliable as they age, a massive bonus for those behind the wheel.

**How many miles between oil changes for a Dodge Caravan?** Dodge recommends getting your Dodge Grand Caravan oil & filter changed every 3,000-5,000 miles, but it's best to check your owner's manual and with your dealer to find out the intervals that work best for your vehicle.

**Does the ECON button really save gas?** The Econ button will significantly increase the fuel efficiency of your vehicle, but not on any road and in all driving circumstances.

**What does econ button do on a Dodge Caravan?** To activate this system, you just have to press the ECON button on your console. It will say ECON and feature a gas pump with a little leaf next to it. When activated, your engine timing and transmission

shift points will automatically be adjusted to ensure you're getting the most out of every drop of gas in your tank.

**Why is my Dodge Caravan using so much gas?** A bad fuel pump can lead to a rough running engine because it is not getting enough fuel. This will lead to a decline in gas mileage. If this issue is not addressed it will lead to a rough, idle, sputtering and stalling. Clogged Fuel Filter: A clogged fuel filter will also cause problems with gas mileage.

**Will there be a 2025 Grand Caravan?** The Pacifica and Grand Caravan appear to be safe for the foreseeable future. In fact, the former will receive a significant update for 2025.
