**What happened with General Motors?** GM is alive and well. They sold 6.3 million vehicles in the 12 months ending in June, 2022, with sales of \$132 billion, and profit of \$13 billion. GM filed for bankruptcy in 2009. Through a creative Chapter 11 reorganization process, the company was split into two parts.

**Is General Motors still successful?** Even so, GM has successfully adapted and emerged as the largest automotive manufacturer in the U.S. in 2022 and positively impacted the American economy, both nationwide and in the local communities of our 120 facilities.

**What is General Motors market share over the years?** General Motors' vehicle sales market share in the U.S. 2015-2023. At about 16.9 percent, General Motors (GM) held a significant portion of the U.S. market in 2023. However, over the course of the last two decades, GM has lost a considerable amount of market share, which stood at about 28 percent some 19 years ago.

**How long has General Motors been in business?** Durant's success with Buick led to the creation General Motors on September 16, 1908. Three years later, he founded Chevrolet, and grew it to a position of market leadership in just three short years.

**Who actually owns General Motors?** The ownership structure of General Motors (GM) stock is a mix of institutional, retail and individual investors. Approximately 83.83% of the company's stock is owned by Institutional Investors, 6.95% is owned by Insiders and 9.22% is owned by Public Companies and Individual Investors.

**Is GM going out of business in 2024?** Hence, it seems that GM has enough assets and liquidity to meet its obligations, and the possibility of the company going out of business or bankrupt in 2024 does not arise.

**Why did GM go broke?** What Pushed GM to Bankruptcy. GM's financial stability had been crumbling prior to the 2008 economic recession and many blame management as being more concerned with turning a profit than pursuing quality and innovation.

**Which GM engine to avoid?** Another engine to avoid is the 2.4-L four-cylinder engine used in particular General Motors vehicles, such as the Chevrolet Equinox and GMC Terrain. Owners of these vehicles have reported significant issues with the engine, including excessive oil consumption and timing chain failure.

**Why is GM so low?** Analysts blamed high interest rates, steep vehicle prices and economic uncertainty for the muted growth. Despite those headwinds, GM delivered an impressive 696,086 vehicles in Q2, led by pickup trucks. The automaker claimed its best auto sales quarter since Q4 2020, as well as its best EV sales quarter ever.

**What is the future of General Motors?** General Motors has committed to electrifying 50% of its fleet by 2030. By 2035, 100% of our automotive fleet, for passenger and light-duty vehicles, will be electric.

**Why not to invest in General Motors?** Ongoing macro headwinds, particularly around the affordability of new cars due to higher interest rates, could be negatively impacting volumes. And as a result of industry conditions, management believes there will be pricing pressures in 2024. The market seems to be shrugging off GM's electric vehicle (EV) division.

**What car is GM discontinuing?** General Motors has announced it will discontinue the long-lived Chevy model in late 2024. In November, the last Malibus will roll off the assembly line at GM's Fairfax factory in Kansas City, which will be retooled — at a cost of \$390 million — to make the new Ultium-based Chevy Bolt EV, starting in late 2025.

**Is GM doing well financially?** GM's business is performing well, as the company's second-quarter 2024 (ended June 30) financial results came in well ahead of Wall Street expectations. Registering impressive top-line performance, with sales totaling just under \$48 billion, was a key highlight. Pricing continues to be a tailwind.

**What car is Chevy bringing back in 2024?** Electric. Blazer EV: The 2024 Blazer EV marks Chevrolet's expansion into electric SUVs. The Blazer EV redefines the electric SUV segment with its style, performance, and efficiency by offering zero emissions, advanced electric technology, and a range of models to suit different needs.

**Why did GM stock crash?** General Motors Co.'s stock fell 6% on Tuesday as the carmaker reported an unexpected loss in China, overshadowing a stronger-than-expected second-quarter earnings report and a raised outlook for the year and leading investors to take profits.

## **Why is GM shutting down production?**

**What was the GM crisis?** On July 29, 2014, a lawsuit was filed in US District Court in Manhattan on behalf of 658 people who claim that they were injured or killed because of the faulty ignition switches in GM's recalled cars. The lawsuit alleges that GM knew about the faulty switches since 2001 but did not recall any of its cars until 2014.

**Why did General Motors lay off employees?** GM, which said about half of the cuts are in the United States, said the cuts were not because of cost cuts but came after a review of operations following the departure of Mike Abbott, executive vice president of software and services in March who left due to health reasons.
