Affirmations work because of neuroplasticity, or the brain's ability to adapt to new situations.

How to rewire your brain for positive thinking? You can rewire your brain to think positively by making a concerted effort to look for the good in every situation, practicing gratitude, and taking time each day to do something you enjoy. Additionally, try to take a step back and look at difficult situations from a more positive perspective.

How long to rewire brain affirmations? However, based on the research into neural plasticity, which is the ability of our brains to change, it is estimated that it takes around 3-6 months to rewire your brain.
