What are the 4 basic elements of communication system? Ans: The fundamental parts of a communication system are sources, input transducers, transmitters, communication channel receivers, and output transducers. Ans: The five aspects of communication are as follows: the source, the message, the channel, the receiver, and the feedback loop.

Which is the fastest way of communication? The telephone is the fastest means of communication. The telephone, invented in 1796 by Gottfried Huth, was the first communication system to use the term.

What is the main purpose of a communication system? Figure 1 is a block diagram of a communication system. This system consists three basic components: transmitter, channel, and receiver.

What is an electronic communication system? Electronic communication can be defined as, the communication which uses electronic media to transmit the information or message using computers, e-mail, telephone, video calling, FAX machine, etc.

What are the two basic kinds of electronic signals? There are two main types of signals used in electronics: analog and digital signals. This article discusses the corresponding characteristics, uses, advantages and disadvantages, and typical applications of analog vs. digital signals.

Which device amplifies the signal? An amplifier is an electronic device that increases the voltage, current, or power of a signal. Amplifiers are used in wireless communications and broadcasting, and in audio equipment of all kinds.

What are the fundamentals of IEC?

What are the fundamentals of electronics technology? In the fundamental of electronics, we study the electronic components, electronic circuits, devices, and their characteristics, which contribute to the formation of an electronic system. In electronic components, the study of active and passive components, semiconductor and integrated circuits are done.

What are the 5 fundamentals of written communication? For effective communication, remember the 5 C's of communication: clear, cohesive, complete, concise, and concrete. Be Clear about your message, be Cohesive by staying on-topic, Complete your idea with supporting content, be Concise by eliminating unnecessary words, be Concrete by using precise words.

What are the fundamentals of communication technology? The communication system has three major components: a transmitter, a receiver and a communication medium. A variety of functions are performed in some order by the transmitter and the inverse of these functions are performed by the receiver in the reverse order.
