In 1905, 11-year-old Frank Epperson accidentally left a cup of fruit punch on his porch overnight. When he discovered it the next morning, the freezing temperatures had transformed it into a frozen treat. 4. The Dyson Vacuum Cleaner Inspired by an Asthma Attack

James Dyson, an industrial designer, suffered from severe asthma triggered by dust. Dissatisfied with the performance of existing vacuum cleaners, he set out to create a more efficient model. His invention, the Dyson vacuum cleaner, uses cyclonic technology to separate dust and allergens from the air, making it ideal for asthmatics and allergy sufferers.

5. The Microwave Oven Inspired by a Radar Tube

Percy Spencer, an American engineer, was working with radar technology during World War II when he noticed that a candy bar in his pocket melted after being exposed to the microwaves. This discovery led him to develop the microwave oven, which uses microwaves to heat food quickly and evenly.
