**Is da Vinci copyright free?** This means that ancient works (sculptures, paintings) such as Da Vinci's, Géricault's or Rembrandt's works are no longer protected by copyright – they are said to be part of the public domain. Accordingly, you are free to reproduce them.

**Where can I see da Vinci notebooks?** The Victoria & Albert's Forster Codices are now fully digitalized. Scala is pleased to present the complete digitalization (more than 600 images) of Leonardo da Vinci's notebooks, better known as Forster Codices. The codices are now kept at the Victoria & Albert Museum of London and can be consulted online.

**Did Leonardo da Vinci publish anything?** Leonardo planned to publish many books but only ever co-published one about proportion that he illustrated. This is one of the most intriguing aspects about his written works. There are only around 1/4 that survived and still number in the thousands if not hundreds of thousands of pages.

**What paper is used in Mona Lisa?** Mona Lisa, oil painting on a poplar wood panel by Leonardo da Vinci, probably the world's most famous painting. It was painted sometime between 1503 and 1519, when Leonardo was living in Florence, and it now hangs in the Louvre Museum, Paris, where it remained an object of pilgrimage in the 21st century.

**What ink did da Vinci use?** During the Renaissance period oak gall ink was the primary ink on the market and many artists used it as drawing medium. For example, technical analysis shows that many of the drawings by Leonardo da Vinci were done

exclusively with iron gall ink, or in combination with other inks.

**Is recreating art illegal?** Generally, in regards to art, copyright lasts throughout an artist's lifetime plus 70 years after their fatality. **Why are Leonardo's notebooks famous?** He is widely considered to be one of the greatest painters of all time and perhaps the most diversely talented person ever to have lived. His notebooks contain diagrams, drawings, personal notes and observations, providing a unique insight into how he saw the world.

**What happened to Da Vinci's notebook?** On Leonardo's death, the Notebook was bequeathed to his pupil Francesco Melzi, who marked it with the letter F. Along with other of his manuscripts, at the end of the 16th century it came into the possession of sculptor Pompeo Leoni.

**Who owns Leonardo da Vinci's notebooks?**

**What did Da Vinci use to make notes?** Leonardo probably worked on loose sheets of paper (bought at one of Milan's many stationers' shops), which he carried about with him to record his observations. His papers were at some stage folded into booklets and later bound, possibly under the ownership of the Spanish sculptor Pompeo Leoni (1533 – 1608).

**What were Da Vinci's notebooks filled with?** The jam-packed pages include ingenious mechanisms he encountered or imagined, notes for books he planned to write, preparatory drawings for his paintings, contrivances for moving theatrical

scenery, records of expenses, and sketches of people who caught his imagination.

**How did Da Vinci draw so well?** Leonardo da Vinci used a drawing technique called “hatching”. Hatching consists of straight or curved lines drawn close to each other to give the illusion of value. Da Vinci was left-handed, and his hatching lines went from the upper left down to the lower right.

**What items did Leonardo da Vinci use?** As an engineer, Leonardo conceived ideas vastly ahead of his own time, conceptually inventing the parachute, the helicopter, an armored fighting vehicle, the use of concentrated solar power, the car and a gun, a rudimentary theory of plate tectonics and the double hull.

[Diagram not provided in this article]

**Band 9 Model Answer:**

The diagram illustrates the intricate life cycle of a butterfly. It begins with the egg stage, where the butterfly hatches from an egg laid by its mother. The caterpillar stage follows, during which the butterfly grows and molts several times. Next comes the pupa or chrysalis stage, where the caterpillar transforms into its adult form. The adult butterfly emerges from the chrysalis and begins its reproductive cycle. The wings of the butterfly are essential for its survival, allowing it to fly and search for food and mates. This complex and fascinating life cycle highlights the remarkable adaptability of nature.
