The Complete Photo to Felting: Ruth Lane

Introduction

The Complete Photo to Felting by Ruth Lane is a comprehensive guide to the art of felting from photographs. This technique involves using wool fibers and a needle to create realistic and detailed felted images from photographs.

Q: What is felting?

A: Felting is a process of interlocking wool fibers together to create a solid fabric. In photo to felting, wool fibers are applied to a photograph and then gently agitated using a barbed needle. This causes the fibers to tangle and create a felted image that resembles the photograph.

Q: What materials are required?

A: To practice photo to felting, you will need Corriedale roving wool, a felting needle, a foam work surface, a photograph, and a fine-tooth comb.

Q: How do you prepare the photograph?

A: Before beginning felting, the photograph should be lightly sanded and covered with a thin layer of clear glue. This provides a surface for the wool fibers to adhere to.

Q: How do you create the felted image?

A: The wool fibers are applied to the photograph in layers, beginning with the background colors. The fibers are then agitated with a felting needle in a circular motion. As the fibers interlock, the image gradually takes shape.

Q: What are some tips for photo to felting?

A: * Use high-quality wool fibers and a sharp felting needle.

- Start with small areas and work your way up to larger ones.
- Be patient and take your time.
- Experiment with different colors and textures to create depth and interest.
- Frame the finished piece for protection and display.
