What is an example statistics math? A statistic is a number that represents a property of the sample. For example, if we consider one math class to be a sample of the population of all math classes, then the average number of points earned by students in that one math class at the end of the term is an example of a statistic.

What is the easiest math to take in college? If you're looking for comparatively easy math classes, consider something like 'College Algebra' or 'Introductory Statistics. ' Both these classes typically cover math fundamentals in a way that is often more understandable and applicable to the real world.
