Zemansky Heat and Thermodynamics: Questions and Solutions

1. What is the First Law of Thermodynamics?

Answer: The First Law of Thermodynamics states that energy cannot be created or destroyed, only transferred or transformed. It is also known as the principle of conservation of energy.

2. What is the Second Law of Thermodynamics?

Answer: The Second Law of Thermodynamics states that the entropy of an isolated system can never decrease. Entropy is a measure of disorder or randomness, and this law implies that isolated systems tend to become more disordered over time.
