And with the third and usually final return, a person enters wise old age. These periods are estimated to occur at roughly the ages of 27–31, 56–60 and 84–90.

What happens to you during your Saturn Return? During your first Saturn Return, you begin to break away from societal pressure, trading expectations for honest experiences. This time of growth allows you to redefine your path, leading you toward your deepest values and authentic desires.

What happens astrologically at age 50? Age 49–50. The next major transit happens around age 49 or 50. This is your Chiron return, when Chiron — the minor planet that represents healing and teaching — comes back to its starting place in your birth chart.
