What are the 3 main objectives of forensic toxicology? Investigations of the holistic use of illegal or prescription drugs, drug poisoning, crime, and unnatural death investigations are the major objectives of forensic toxicology.

What is the principle of analysis in forensic medicine? The main principles of Forensic Science are Law of Exchange (Every contact leave traces), Principle of Individuality (Everything is unique), Law of Comparison (only similar things can be compared with similar), Principle of Linkage (crime scene, evidences, victim and

accused somewhere linked with each other), Law of ...

What is the subject of forensic medicine? Forensic medicine refers to the application of medical knowledge to questions of law. It deals with: The deceased, e.g. forensic pathology, forensic odontology, forensic anthropology, and forensic entomology; The living, i.e. clinical forensic medicine with its involvement in assault, rape and some forms of trauma.

Why do we need forensic medicine? Forensic medicine is a broad term used to describe a group of medical specialties which deal with the examination and diagnosis of individuals who have been injured by or who have died because of external or unnatural causes such as poisoning, assault, suicide and other forms of violence, and apply findings to law (...

What is the aim of forensic medicine? The aim of the course is to explain main forensic aspects of medical issues, starting from forensic pathology (wound examination and documentation) and followed by the clinical forensic medicine (rape, sexual and domestic violence, child abuse and neglect, torture, age estimation).

What is the difference between forensic science and forensic medicine? Many subspecialties fall under this umbrella including forensic chemistry, forensic biology, etc. At the heart of their collaboration lies a symbiotic relationship, where forensic medicine scrutinises the body and its demise, while forensic science dissects physical evidence collected from scenes and bodies.
