

# Biostatistics and epidemiology question usmle step 1

## [Download Complete File](#)

**What percent of Step 1 is biostatistics?** Biostatistics makes up 4–6% of the Step 1 exam.

**What type of questions are asked in USMLE step 1?** Some questions test the examinee's fund of information per se, but the majority of questions require the examinee to interpret graphic and tabular material, to identify gross and microscopic pathologic and normal specimens, and to solve problems through application of basic science principles.

**What is on the USMLE step 1?** Step 1 assesses whether you understand and can apply important concepts of the sciences basic to the practice of medicine, with special emphasis on principles and mechanisms underlying health, disease, and modes of therapy.

**Is USMLE step 1 multiple choice?** The USMLE Step 1 consists of 280 multiple-choice questions administered over an eight-hour period. The exam covers topics such as anatomy, biochemistry, pharmacology, and physiology, among others.

**What score is 80% on Step 1?** The 80th percentile means that you scored in the top 20% in the country - so you'd be more than one standard deviation above the mean. Your score would be 240+.

**Is 60 enough to pass Step 1?** Notice of such review and any adjustments will be posted on the USMLE website. The percentages of correctly answered questions required to pass varies by Step and from form to form within each Step. However, examinees typically must answer approximately 60% of questions correctly to

achieve a passing score.

**Is Step 1 the hardest exam ever?** Is Step 1 a Difficult Exam? Many students find Step 1 to be a hard exam. This is likely your biggest exam since the MCAT. Including breaks, that test was 7.5 hours and for Step 1, you can add an additional 30 minutes of fun for a total of 8 hours (spoiler: Step 2 is 9 hours, but that's for another time!).

**Can you pass Step 1 with just UWorld?** Is UWorld Enough to Pass Step 1? UWorld alone is not enough. You should use UWorld along with these tips to effectively prepare for Step 1: Combine UWorld with other resources, such as First Aid and NBME self-assessments.

**How many fake questions are on Step 1?** Some people say the reason why NBME is only 200 questions vs 280 on the real deal is because 80 of the 280 are experimental questions that aren't counted. Others say 20% of the exam (56 questions) are experimental.

**Is Step 1 harder than mcat?** In terms of exam difficulty, the MCAT is considered easier compared to the USMLE Step 1. It is because the MCAT only tests the basic science principles and skills of the individual if one fits the requirement to proceed or enter med school.

**What is the highest score on USMLE 1?** USMLE results are reported on a three-digit scale from 1 to 300 with the exception of Step 1, which is pass/fail.

**How many hours should I study for Step 1?** How many hours a day should you study for USMLE Step 1? USMLE prep time may take longer depending on your everyday schedule and other responsibilities. With a dedicated four-to-six week schedule, you can study up to 12 hours a day.

**What is the failure rate for the USMLE?**

**Can you fail Step 1 and still match?** You're probably asking, "can you get a residency if you fail Step 1?" The short answer: yes! A JAMA study found > 99% of graduates entered GME/practice in the US within six years of graduation. In other words, even though roughly 3% of people didn't match in a given year, most ended up in residency/practice.

**Do most med students pass Step 1?** First, consider that nearly all medical students pass the Step 1 exam.

**Is 50% good for UWorld?** What percentile on UWorld do I need to pass the NCLEX? Your NCLEX QBank percentile is defined by how many QBank users perform at or below your performance level. For example, if you are in the 47th percentile, you perform better than 47% of other users. Ideally, you want to perform better than 60% of users.

**What score is 50% on Step 1?** Until the scoring system for Step 1 changes to Pass/Fail, the scores on Step 1 can be interpreted based on historical percentiles. While 194 represents the 5th percentile, the average (50th percentile) falls between 230 and 235. Scores at or just above the mean are good scores!

**What is a bad Step 1 score?** An Overview of USMLE Step 1 Scores A score of minimum pass to 215 would be considered low, yet still a pass. The lowest passing score possible is 194, which equates to just north of 55% correct of the 350 questions. This score means that you are likely to only be able to match the less competitive specialties.

**Is Step 1 the hardest exam?** Traditionally, Step 1 has been thought of as both the most difficult and most important USMLE Step exam. There are several reasons for this. Firstly, this exam is the first in the series, and students taking it will have had less experience with the types of questions that the USMLE asks.

**Which is harder, Step 1 or Step 2?** Each Step's difficulty will depend on your knowledge and abilities, so wondering how hard Step 1 or Step 2 is may not get you anywhere. Step 1 tests a broad range of basic science knowledge and Step 2 focuses on a smaller range of content that directly applies to practicing medicine.

**What percent correct is a 196 on Step 1?** Assuming Step 1 is scored similarly to CBSSA 25-30, you would need somewhere between 63 to 65% correct to attain the passing score of 196.

**What percentage of step 2 is biostats?**

**How hard is it to get into a biostatistics program?** You'll need a solid GPA from all previous education. Your prior coursework should be in biostatistics, public health, or a closely related field. College-level statistics and biology will be required. Many programs will also look for strong GRE scores and work experience in a related position.

**What percent of Step 3 is biostatistics?**

**What is most predictive of Step 1 score?** Based on prior informal student reporting, NBME 28 and UWSA 2 are the most correlated with Step 1 performance. Given this information, it might be a good idea to take these two exams when you are further along in your dedicated study and closer to your actual test day.
