Was Keynes a socialist? O'Donnell (1992, p. 781; 1999, p. 153) suggests Keynes became a socialist in the mid-1920s, but the evidence shows he was a socialist from at least 24 October 1907 onwards.

Does Keynes support capitalism? Keynes did not object to capitalism as an economic system, per se; but he was deeply critical of “individualistic” or “laissez faire” capitalism, where individualistic and laissez-faire describe both the nature of the economic system and the motivations of the people within it.

What did Keynes believe? Keynesians believe that, because prices are somewhat rigid, fluctuations in any component of spending—consumption, investment, or government expenditures—cause output to change. If government spending increases, for example, and all other spending components remain constant, then output will increase.
