## Download Complete File

**What is comp-XM?** In brief, Comp-XM is a simulation-based assessment tool designed to broadly capture “business acumen” – knowledge and skills related to the various functions of organizational management.

**Is the comp-XM exam proctored?** Capsim's partnership with Proctorio brings a comprehensive proctoring solution directly within Comp-XM — at no additional cost to you. With the automated integration, instructors can: Validate that their students are the ones taking the exam. Ensure no one else is helping them complete the exam.

**How is comp-xm graded?** Scoring occurs in two parts, the results of your Mini Quiz, and the results of your simulation, which are assessed via a Balanced Scorecard. If they were scheduled in your previous simulation, your Comp-XM Basix simulation will utilize the Human Resources and TQM (Total Quality Management)/Sustainability modules.

**What is a good CompXM score?** The exam is done individually by each student and consists of four rounds including simulation decisions and board queries. There are a total of 1000 possible points that can be earned in the CompXM. Scores of 700 or higher are considered good results.

**What is XM?** That's what Experience Management (or “XM”) is all about. XM is the discipline of using both experience data and operational data to measure and improve the four core experiences of business: customer, employee, product, and brand. What does XM look like in practice?

**What is leverage on XM?** XM Leverage Depending on the account type you open at XM, you can choose the leverage on a scale from 1:1 to 1000:1. Margin

requirements do not change during the week, nor do they widen overnight or at weekends.

**Can test proctors see your screen?** Proctors have the ability to view the screen and utilize the mouse and keyboard as if they were sitting next to you. Once the exam starts, your proctor will monitor everything on the computer screen, but can no longer utilize the your mouse and keyboard.

**Can you talk to yourself during a proctored exam?** It's recommended against either talking to yourself or looking around the room, because the proctor is going to be paying attention and is also going to be alerted to anything that you're doing. So if you're talking, they don't know if you're talking to someone else.

**Can a proctored exam see you?** Lastly, the proctor then has you spin your webcam around the room so they can see where you are taking the test. If you can have your webcam securely attached to your monitor or even better as built into your monitor, this limits the range of visibility that they can see.

**Why is automation important in CapSim?** As automation levels increase, the number of labor hours required to produce each unit falls. At an automation rating of 1.0, labor costs are highest. Each additional point of automation decreases labor costs approximately 10%. At a rating of 10.0, labor costs fall about 90%.

**How to ace capsim?** The goal of Capsim is to help students relate to what happens in the real world. OneThe secret for winning lies in looking at your competition to see what they are doing, and then adapting and strategizing to do things better and make better decisions— just like in the actual competitive marketplace.

**What is a good TAAS score?** The scale score ranges from approximately 400 to 2400, with a minimum expectations score of 1500.

**What is the Z-score for the top 40 percent?** Answer and Explanation: Thus, the probability that a Z-score is above "z" is 0.40. By comparing equation (1) and (2),  $z = 0.25$ . Hence, the Z-score is 0.25 that separates the higher 40% scores from all the scores.

**Is 400 1 leverage good?** However, you should be very careful with brokerage accounts that offer this huge leverage on small accounts. 1:400 leverage comes with high risk, and your account can be automatically wiped out, especially if you deposit a small amount like \$500.

**How does SmarterProctoring detect cheating?** Upon students starting a remote exam, the automated proctoring system's AI will record the students' screen, webcam, and microphone to ensure the integrity of the exam.

**Can proctor detect my phone?** So, while it doesn't "detect" the phone per se, it can record the act of looking or interacting with it. Audio Monitoring: Some people think about how to cheat on a proctored exam by playing pre-recorded information on their phone. But, if played out loud, the software can detect unusual sounds.

**What should you not do in a proctored exam?** The desk or walls around you must not have any writing. The room must be as quiet as possible. Sounds such as music or television are not permitted. No other person is allowed to enter the room while you are taking the proctored exam.

**What is the CAPSIM exam like?** Participants also answer five sets of multiple choice questions, called Board Queries. The questions are common for each participant, and therefore exam performance can be compared class-wide, school-wide or even across all Comp-XM users. However, the answers are based on each individual simulation.
