## [Download Complete File](#)

**What is the NFPA 25 standard for inspection?** Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems. NFPA 25 is the baseline for inspection, testing, and maintenance of water-based fire protection systems. Compliance helps maximize system integrity to avoid failure and ensure fast, effective response in a fire emergency.

**What is the latest edition of NFPA 25?** So, NFPA periodically updates standards to address new issues, improve upkeep, and clear up confusion from previous editions. The NFPA 25 committee recently released the 2023 edition of the document.

**What is the NFPA 25 maintenance plan?** NFPA 25 is the Standard for the Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems. The purpose of NFPA 25 is to provide requirements that ensure a reasonable degree of protection for life and property from fire through minimum ITM requirements for water-based fire protection systems.

**What is the NFPA 25 5 year report?** The AHJ will typically request an NFPA 25 report that lists the results of each system's 5-year inspection, including visual evidence of the internal condition of piping. These reports reveal the severity of potential obstruction problems and if the obstruction is isolated or has a wider impact on the community.

**Who is responsible for ensuring that the inspection testing and maintenance requirements for NFPA 25 for water-based fire suppression systems are performed?** The intent of NFPA 25 is that the owner or the owner's designated

representative(s) perform many of the required inspections.

**What is the owner responsibility of NFPA 25?** NFPA 25 also includes responsibilities for inspection, testing, and maintenance (ITM) of water-based fire protection systems that specifically fall to the owner or their designated representative. This information is essential for building owners and their designated representatives to know and understand.

**What is the difference between NFPA 25 2017 and 2020?** The 2017 edition of NFPA 25 introduced the first-ever requirements permitting automated inspection and testing of water-based fire protection systems. NFPA 25 2020 expands those requirements to cover new automated testing technology, such as a flow switch capable of simulating water flow.

**What is the most used NFPA standard?**

**How many sprinkler heads need to be tested?** The standard requires testing of a minimum of four sprinklers or one percent of the total sprinklers installed in a sample area (whichever is greater). The frequency at which sprinklers are required to be tested is based on the type of sprinkler.

**How long to run fire pump NFPA 25?** Electric pumps must be run for a minimum of 10 minutes while diesel pumps must be run for a minimum of 30 minutes. Qualified personnel must be in attendance whenever the pump is in operation unless automated inspection and testing is performed in accordance with the requirements of NFPA 25.

**What is the NFPA 25 air leakage test?** Air leakage—every three years NFPA 25 permits two methods for conducting air leakage tests every three years: A pressure test at 40 psi for two hours. The system is pressurized, and the air supply is shut off. To pass the test, the system may lose up to 3 psi (0.2 bar) of air pressure.

**What is the difference between NFPA 25 and NFPA 72?** For example, NFPA 25 addresses the “operating condition” of fire protection systems and specifically states that it “does not require the inspector to verify the adequacy of the design of the system.”<sup>2</sup> NFPA 72 however, has no such directive and does not restrict inspections and tests to verifying the operating ...

**What is NFPA 25 breakdown?** NFPA 25 addresses a wide range of water-based fire protection systems. Such as sprinkler systems, standpipe and hose systems, fixed water spray systems, water mist systems, foam-water sprinkler systems, and even private fire hydrants.

**What are the NFPA record keeping requirements?** According to NFPA 25, "records shall be retained for a period of 1 year after the next inspection, test, or maintenance of that type required by the standard." For example, you need to keep 3 test reports for any system 3 years or older that requires annual testing.

**What is the most severe rating on a NFPA safety?** It identifies the degree of severity of the health, flammability, and instability hazards. Hazard severity is indicated by a numerical rating that ranges from zero (0) indicating a minimal hazard, to four (4) indicating a severe hazard.

**What is the life expectancy of a fire sprinkler system?** What is the life expectancy of a sprinkler system? Building owners and facility managers usually expect fire sprinkler systems to last 40 to 50 years.

**What is an NFPA inspection?** The NFPA defines an inspection as "a visual examination of a system or portion thereof to verify that it appears to be in operating condition and is free of physical damage (NFPA 25)." Example: A daily or weekly visual inspection of sprinkler and/or standpipes' valves, valve components, and trim inspections.

**What is the hydrostatic test for NFPA 25?** As per NFPA 25 (2020 Edition, 13.8. 5), the piping from the fire department connection to the fire department check valve must undergo a hydrostatic test at 150 psi (10 bar) for a duration of 2 hours, at least once every 5 years.

**Who is ultimately responsible for the inspection, testing, and maintenance of the fire protection systems in a building?** Section 4.1. 1 is quite possibly the most important rule in the entire standard. This clearly designates the owner as the entity responsible for ensuring that all inspection, testing and maintenance (ITM) tasks pertaining to the type of fire protection system installed in their building are to be completed.

**Who is ultimately responsible to ensure testing and maintaining a fire alarm system is conducted at a protected premises?** Additional fire alarm services including equipment installation, inspection, testing, and maintenance are the responsibility of the owner and can be accomplished in-house or be contracted out.

**What is the section 7.3 of NFPA 25?** 7.3. Underground and exposed piping shall be flow tested to determine the internal condition of the piping at minimum 5-year intervals.

**What is the NFPA standard for fire extinguisher inspections?** The inspection requirements applicable to portable fire extinguishers are covered in NFPA 10(10), Sec. 7.2. Portable fire extinguishers are required to be visually inspected when initially placed in service and at least monthly at a minimum of 30-day intervals thereafter [see NFPA 10(10), Sec.

**What is an NFPA inspection?** The NFPA defines an inspection as "a visual examination of a system or portion thereof to verify that it appears to be in operating condition and is free of physical damage (NFPA 25)." Example: A daily or weekly visual inspection of sprinkler and/or standpipes' valves, valve components, and trim inspections.

**What is the section 7.3 of NFPA 25?** 7.3. Underground and exposed piping shall be flow tested to determine the internal condition of the piping at minimum 5-year intervals.

**What is the NFPA standard for the inspection testing and maintenance of water-based fire protection system?** WBITM certification is primarily based on NFPA 25, Standard for the Inspection, Testing, and Maintenance of Water-based Fire Protection Systems, and references a variety of other NFPA codes and standards.
